MEMORANDUM

SUBJECT: EPA Reg. No./File Symbol 4816-688
Petmanone Multi-Purpose 107 E.C.

FROM: William S. Woodrow WSW 4-17-89
Precautionary Review Section E 4/18/89
Registration Support Branch
Registration Division (TS-767C)

TO: George La Rocca (PM 15)
Insecticide-Rodenticide Branch
Registration Division (TS-767C)

APPLICANT: Fairfield American Corp.
8th and Harrison Streets
Frenchtown, NJ 08825

FORMULATION FROM LABEL:

<u>Active Ingredient(s):</u>	<u>% by wt.</u>
<u>Permethrin: (3-phenoxyphenyl) methyl (+/-)</u>	<u> </u>
<u>cis/trans 3-(2,2-dichloroethyl) 2,2-</u>	<u> </u>
<u>dimethyl cyclopropane carboxylate</u>	<u>10.0</u>
<u>Inert Ingredient(s):</u>	<u>90.0</u>
Total	100.0%

BACKGROUND:

69201

1

BACKGROUND:

Fairfield American Corp. stated in a June 23, 1958 letter from Mr. Jan Brill to George La Rocca that they discovered a need for signal word change from CAUTION to DANGER; based on original product formulation. The Co. reformulated, conducted another Primary eye irritation study, based on the new formulation, and states that the new study justifies retention of the present CAUTION signal word.

RECOMMENDATION:

The Primary eye irritation study conducted using 10% A.I. Permethrin, is acceptable to Registration Support Branch/PRS. Eye irritation persisted through 10 days, was absent by day 14.

LABELING:

- 1) Change the Permethrin Multi-Purpose 10% E.C. from "CAUTION" to read "WARNING".
- 2) Under Precautionary Statements, add the following "Causes substantial but temporary eye injury. Wear goggles, face shield, or safety glasses."
- 3) The Statements of Practical Treatment are acceptable.

Tox Chem No. 652BB
