MEMORANDUM

OFFICE OF
PESTICIDES AND TOXIC SUBSTANCES

SUBJECT: PP#3G2856. Iprodione on beans. Amendment of 6/24/83 including revised Section B.

FROM: Andrew R. Rathman, Chemist
Residue Chemistry Branch
Hazard Evaluation Division (TS-769) *AR Rathman 7/13/83*

THRU: Charles L. Trichilo, Chief
Residue Chemistry Branch
Hazard Evaluation Division (TS-769) *[Signature]*

TO: Henry M. Jacoby, Product Manager
Fungicide-Herbicide Branch
Registration Division (TS-767)

and
Toxicology Branch
Hazard Evaluation Division (TS-769)

In our 6/3/83 review of the original request, we recommended against the proposed tolerance and requested the Company revise the label to preclude the feeding of any plant parts to animals and to preclude use on cowpeas. The Company has revised the labeling in line with our request and ~~we~~ now recommend for the requested temporary tolerance for residues of the fungicide iprodione [3-(3,5-dichlorophenyl)-N-(1-methylethyl)-2,4-dioxo-1-imidazolidinecarboxamide], its isomer [3-(1-methylethyl)-N-(3,5-dichlorophenyl)-2,4-dioxo-1-imidazolidinecarboxamide] and its metabolite 3-(3,5-dichlorophenyl)-2,4-dioxo-1-imidazolidinecarboxamide in or on beans (dry or succulent) at 2 ppm.
