MEMORANDUM

Date: July 1984

Subject: P.P. 3F2964 - Glycophene/grapes  
RCB Referral - Caswell #470A

From: Alex Arce: Toxicology Branch  
Reviewer (TS 769)

To: H. Jacoby: PM #21  
R.D. (TS767)

Thru: R. Coberly - Tox Branch  
R. Zendzian - Tox Branch, Sect III  
W. Burnam - Chief, Tox Branch

*[Signature]* 7-31-84

*RCB* 7/31/84  
*[Signature]* 8/13/84

Request

In a memo dated June 26, 1984, to H. Jacoby, R.W. Cook, RCB recommended against requested tolerances (Refer to attached memo) until the unknown Z in poultry liver was identified.

Recommendations

Re: Memo Arce to Jacoby dated March 30, 1984, in which the "Unknown Z" residue is properly identified (memo attached). Thus: Tox Branch has no objections to granting the requested tolerances since they have been already approved. (Refer to the attached print out).

Note R. W. Cook was not informed of the decision regarding metabolite "Z" at the time at which he submitted his negative recommendation.
