Reg./File # : 359-685

Chemical Name: Iprodione

Type Product : Fungicide

Product Name : Rovral Fungicide

Company Name : Rhone-Poulenc, Inc.

Purpose : Review addition to the label of dry bulb onions and peanuts
that may be rotated after harvest.

Action Code: 305

EAB #(s): 70573

Date Received: 5/12/87

TAIS Code: 303

Date Completed: JUL 31 1987

Total Reviewing Time: 0.8 day

Monitoring study requested:

Monitoring study voluntarily:

Deferrals to: Ecological Effects Branch

 Residue Chemistry Branch

 Toxicology Branch

1. CHEMICAL: Common name:

Iprodione

Chemical name:

3-(3,5-Dichlorophenyl)-N-(1-methylethyl)-2,4-dioxo-1-imidazolidinecarboxamide.

Trade name(s):

Rovral, RP 26019, Glycophene

Structure:

Formulations:

50% WP

Physical/Chemical properties:

Molecular formula: $C_{13}H_{13}Cl_2N_3O_3$.

Molecular weight: 329.9

Physical state: White, odorless, nonhygroscopic crystals.

Solubility: Soluble in acetone and benzene. Almost insoluble in water (13 mg/L).

2. TEST MATERIAL:

Not applicable.

3. STUDY/ACTION TYPE:

Amendment of label to include dry bulb onions and peanuts as crops that may be rotated after harvest.

4. STUDY IDENTIFICATION:

Not applicable.

7. CONCLUSIONS:

EAB has reviewed the request to add dry bulb onions and peanuts as crops that can be rotated after harvest and find this proposal to be supported by the existence of tolerances that have been established on these crops. However, rotational crop studies will be required on other crops listed under NOTE TO USER statement. See RECOMMENDATION.

8. RECOMMENDATION:

The specimen label (proposed) submitted by the registrant states the following:

NOTE TO USER: The following crops may be rotated after harvest:
Garlic, Dry Bulb Onions, Leafy Vegetables, and Peanuts.

The following crops may be rotated the year following treatment: Root Crops, Cereal Grains, Soybeans, and Tomatoes.

EAB has no rotational crop data for any of the crops listed. However, it was communicated to us by Residue Chemistry Branch that the crops shown as being rotated after harvest (garlic, dry bulb onions, head lettuce, and peanuts) have established tolerances, which would allow them to be rotated after harvest without the need for rotational crop studies.

Therefore, the registrant's request to add dry bulb onions and peanuts to their label as crops that can be rotated after harvest is supported by the tolerances that have been established. This support also includes garlic, which also has an established tolerance. However, the "crop" listed as Leafy Vegetables should be replaced by Head Lettuce, since only this leafy vegetable has an established tolerance. Other leafy vegetables that do not have a tolerance would require a confined rotational crop study.

The second line in the NOTE TO USER statement refers to rotating root crops, cereal grains, soybeans, and tomatoes one year after treatment. We cannot support these rotations. We have no rotational crop data on these crop groupings/crops, therefore, radiolabeled, confined rotational crop studies are required for them.

9. BACKGROUND:

A. Introduction

Rhone-Poulenc is requesting a change in the rotational crop statement on their Rovral label to include dry bulb onions and peanuts as crops that may be rotated after harvest.

B. Directions for Use

Iprodione is a contact fungicide active on a broad spectrum of diseases including Botrytis, Sclerotinia, Monilinia, Alternaria, Helminthosporium, Fusarium, and Rhizoctonia. See attached specimen label.

10. DISCUSSION OF INDIVIDUAL TESTS OR STUDIES:

Not applicable.

11. COMPLETION OF ONE-LINER:

Not applicable.

12. CBI APPENDIX:

There is no CBI in this submission.
