7. CONCLUSIONS:

EAB has reviewed the data in our file regarding the request to add <u>cane</u>berries to the label and finds that <u>all</u> of the data requirements for an orchard-type, terrestrial crop use (e.g. <u>cane</u>berries) have been satisfied. See RECOMMENDATIONS.

#### 8. RECOMMENDATION:

The data required to register a pesticide for use on <u>cane</u>berries and their current status in our files is as follows:

Data Requirement Status in File				
• Hydrolysis Accepted.				
Photodegradation (water) Accepted.				
Photodegradation (soil) Accepted.				
• Aerobic and anaerobic soil metabolism Accepted.				
• Leaching (soil column)				
• Field soil dissipation Accepted.				
• Fish accumulation Accepted.				

Therefore, no studies are required for registration of caneberries.

Note to PM: The letter to Rhone-Poulenc to RD speaks of adding caneberries but RD's Data Review Record indicates the submission deals with cranberries and the proposed label speaks of canberries.
