OFFICE OF
PESTICIDES AND TOXIC SUBSTANCES

MEMORANDUM:

SF 2934

SUBJECT: Vinclozolin Review of Analytical Method for
Formulated Product

FROM: Jesse E. Mayes, Chemist *[Signature]*
Residue Chemistry Branch
Hazard Evaluation Division (TS-769)

THRU: Charles L. Tichilo, Chief
Residue Chemistry Branch
Hazard Evaluation Division (TS-769) *[Signature]*

TO: Henry Jacoby (PM-21)
Registration Division (TS-769)

and

Toxicology Branch
Hazard Evaluation Division (TS-769)

BASF Wyandotte Corporation submitted a copy of an analytical method for determining the active ingredient, vinclozolin (Ronilan) in Ronilan® formulated product. The method employs IR spectrophotometry quantitating the major peak at 1827 cm⁻¹.

The same method was reviewed with Pesticides Petition No. 8G 2068 (Acc#096963). We do not feel that any further comment is necessary at this point.
