RCB does not concur in sign-off because:

- (1) Status of inert [REDACTED] is not resolved. It is apparently still unclear. *↑ Bob Taylor 2E2179*
- (2) Tolerance is not proposed in the terms we requested; parent plus 3,5-dichloroaniline moiety containing metabolites.
- (3) To our knowledge, vinclozolin is not a common name. It should not appear in the Regulation.
