

AUG 31 1982

MEMORANDUM

TO: John W. Melone
Acting Director
Hazard Evaluation Division (TS-769)

SUBJECT: Glean Registration Standard

I am recommending that you non concur on the glean registration standard dated August 24, 1982.

The residue chemistry chapter prepared by Dupont lacks sufficient detail to be of use to my branch. Also, the residue chemistry chapter does not agree with the data gap tables. Note that SPRD previously agreed to replace the Dupont residue chemistry chapter with the RCB reviews (see memo of Jan Auerbach, 8/17/82 attached). I also sent SPRD a list of memo dates that are relevant to the standard as requested on August 15 by Jan Auerbach (see my memo dated August 16, 1982, also attached).

Since the RCB residue chemistry reviews contain the necessary information needed for future Branch reference, and the Dupont summary does not, I can not concur with this document.

Charles L. Trichilo, Chief
Residue Chemistry Branch
Hazard Evaluation Division (TS-769)
