7. CONCLUSIONS:

The revised experimental program appears to be complete.

Based on previously accepted supportive data and the current revised experimental program, EAB concurs with the proposed EUP use on citrus.

8. RECOMMENDATIONS:

See §7, above.

9. BACKGROUND:

A. Introduction

On 3/28/84, EAB completed its review of all data to support the EUP use of Avermectin on citrus, and found all EF data adequate for that purpose.

In the current submission, the experimental program has been amended.

B. Directions for Use

A copy of the modified experimental program is appended to this review. The registrant proposes to apply a total of 90 gallons of MK-936 0.15 EC, equivalent to 13.5 lb ai, to a maximum of 180 acres of citrus in the states of CA, AZ, TX and FL.

The experimental period is expected to run from 1/1/86 thru 12/31/86.
