

NOTE TO: D. Stubbs/L. Pemberton

SUBJECT: Avermectin Exposure Analysis

FROM: J. R. Tomerlin, TAS Staff *JR Tomerlin 9/7/89*

The avermectin dietary exposure analysis (J. R. Tomerlin memo, 9/7/89) reported the wrong study as the basis of the acute NOEL. The study the acute NOEL is actually based on is a mouse teratology study with the delta 8,9 isomer.
