

Memorandum of Meeting

November 8, 1984

ICI - Dr. Ian Hill, R. Griggs, B. Feldberg, G. Wagner

PM Team 25

EAB/RD - S. Creeger

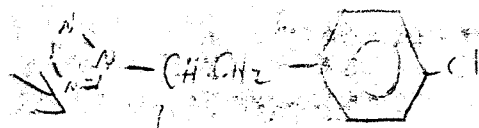

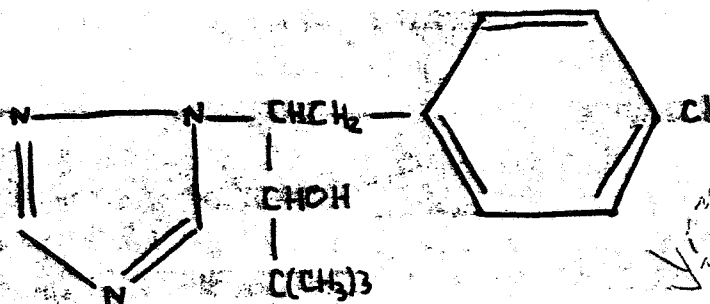

Met with the above reps to discuss the field dissipation study data requirement in support of the registration of PACLOBUTRAZOL, a new plant growth regulator.

The company agreed to send a protocol for our review. They would also like EAB to consider utilizing a field study done at 2 lb ai/A ~~in support~~ to support use at 38 lb ai/A. I said we would consider that when we review the protocol.

S. Creeger
Nov. 8, 1984

Note - Paclobutrazol is very similar in structure to Bayleton.

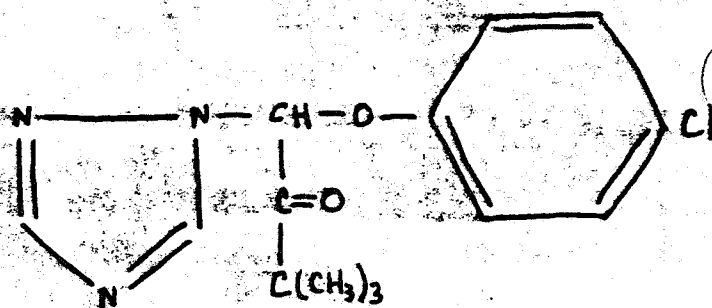

PAClobutrazol

$O=C$

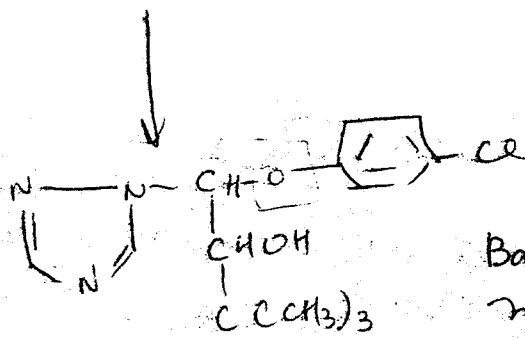

$C(C_3)_3$

Bayleton

(The only major product)

?

S.H. 7-18-85

Baytan, major soil product of Bayleton
