MEMORANDUM

SUBJECT: FAP#6H5515. Cyfluthrin in Food Handling Establishments.
Amendment of 01/28/88. MRID No. 403015-02
RCB No. 3293

FROM: Martha J. Bradley, Chemist *MJB*
Residue Chemistry Branch
Hazard Evaluation Division (TS-769C)

TO: George T. LaRocca, PM 15
Insecticide-Rodenticide Branch
Registration Division (TS-767C)

and

Toxicology Branch
Hazard Evaluation Division (TS-769C)

THRU: Charles L. Trichilo, Chief
Residue Chemistry Branch
Hazard Evaluation Division (TS-769C)

In our memo of 01/15/88, we noted the remaining deficiencies in this petition as follows:

The modifications in the tolerance enforcement method, Report No. 85883, third revision, must be checked by the laboratory personnel in Chemical Operations Branch, BUD to determine whether it conforms to the actual method as modified by the method trial. In addition, this Report should also be submitted without being stamped "Property of Mobay Corporation".

Response

Mobay has submitted copies of Report No. 85883 that are not stamped "Property of Mobay Corporation".

RCB Comments/Conclusions

The laboratory personnel in Chemical Operations Branch, BUD have checked the revised method (telecon Dallas Wright to M. Bradley, 01/27/88) with their records and have determined that the revision conforms to the modifications made in the method trial.

The remaining deficiencies have been resolved.

RCB Recommendation

TOX considerations permitting, RCB recommends for the proposed tolerances of 0.05 ppm on foods or feeds and the regulations for 21 CFR 193 and 21 CFR 561 as proposed in Revised Section F dated July 29, 1987.
