Benefits and Use Division (TS-768)

Rohm and Haas Co. has submitted a revised version of the report entitled:

R.O. Deakyne, C.L. Brackett, L.S. Mazza and
S.S. Stavinski (1987). "Addendum 2 to RH-
3866 Total Residue Analytical Method for
Grape and Apple (Technical Report No. 310-
84-27)". Lab Memo No. 31S-87-46

In this version the words "...for RH-9090" are included in Sec. 5.8, line 2, page 6. In all other respects, the method is unchanged.

This revision was requested by RCB from Rohm and Haas Company as a result of the meeting between COB and RCB on January 28, 1988, and serves as written confirmation of the information I verbally gave to Mr. Everett Greer of COB by telecon on January 29, 1988.

A copy of this revised Addendum 2 is also being sent to Mr. Greer for his use in conducting the Rally™ method trial on apples or grapes.

If RCB may be of further assistance to COB, please let us know.
