DEB has been requested to screen this submission for acceptability for full scientific review. This screen focuses on the presence or absence of the residue and product chemistry data prescribed in the Guidelines/Regulations. The adequacy of those data have NOT been evaluated here. Full scientific review and evaluation of the data will likely result in the requirement for additional data in support of the proposed permanent tolerance/exemption. The following screen problems need resolution before the data package is acceptable for full DEB review.

(Check missing or deficient areas and explain)

9. (Technical Product) Product Identity/Chemistry ☐ previously submitted (6/24/88); data located in MRID No's 407009-01 thru -03.
10. Use Info/Revise Section B ☒ Clarify if 45DF formulation is Elite® or Folicur® or both. Revise label, etc., as applicable, to use correct name for the 45DF. Clarify if common name is tebuconazole or tarpuconazole.
11. Plant Metabolism ☐
12. Animal Metabolism ☐
13. Residue Data ☐
14. Storage Stability ☒ Deficient in scope (commodity representation) and duration of studies. Ref. Agency Position Document on Storage Stability, 8/87, NTIS# PB88 112362/AS.
15. Geographical Representation ☐
16. Meat, Milk, Poultry, Eggs ☐
17. Enforcement Method ☐ Plant residue method was previously submitted (6/24/88) and assigned MRID No. 407009-63.
18. Multiresidue Methods ☐
19. Analytical Reference Stds ☐ Not at RTP-NC.
20. Revise Section F ☐
21. Processing Data ☐
22. Other ☐

### 23. DEB RECOMMENDATION

- ☐ PASS SCREEN; accept for full scientific review by DEB.
- ☒ FAIL SCREEN; corrective action needed prior to acceptance by DEB for full review.
