MEMORANDUM

SUBJECT: ID# 000264-EUP-OL. Fipronil - Review of 12/7/94 meeting with Rhône-Poulenc. Barcode D210224. Case 034647. CBTS# 14856.

Health Effects Division (7509C)

TO: Rebecca Cool, Acting Product Manager  
Daphne Waldo, Team 10 Reviewer  
Registration Division (7505C)

On December 7, representatives of EPA met with Rhône-Poulenc to discuss issues related to the pending EUP (PP#3G04263) and submitted Section 3 registration for the insecticide fipronil on corn. Most of the discussion dealt with tox issues. The registrants' primary residue chemistry concern related to crop rotation restrictions. The registrant is proposing a conditional registration with a label restriction limiting rotation to the primary crop, corn. They feel that this restriction is practical as the pest controlled by fipronil, corn rootworm, is not a problem in fields which are rotated. CBTS agreed to consider this proposal.

Rhône-Poulenc has submitted their minutes of the meeting for our review. This summary addresses only TOX and RD issues. As residue chemistry issues were not included, CBTS is unable to comment on the accuracy of these minutes.
