HARRIS FAMOUS ROACH TABLETS

DIRECTIONS

Place these tablets wherever cock-roaches and waterbugs are seen. Apply liberally to badly infested areas and in unexposed spots, if desired. Crush and pour into tiny crevices. This product is not a repellent but a food which kills these pests after feeding upon it. This breaks up hidden breeding places and guards against reinfestation.

Active Ingredient 40%
Boric Acid
Inert Ingredients 60%

CAUTION: Keep away from animals, feed and foodstuffs.
