Kellie MacLeod
P.F. Harris Manufacturing Company, LLC
P.O. Box 1922
Cartersville, GA 30120

Subject: Label Amendment – Registration Review Interim Decision Label Mitigation
and Alternate Brand Name (ABN) Notification per PRN 98-10
Product Name: Harris Termite Powder
EPA Registration Number: 3-14
Received Dates: 9/13/18 and 1/10/19
Decision Numbers: 545626 and 577398

Dear Kellie MacLeod:

The amended label referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), as amended, is acceptable. This approval does not affect any conditions that were previously imposed on this registration. You continue to be subject to existing conditions on your registration and any deadlines connected with them.

The Agency, in accordance with the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), as amended, has completed reviewing all of the information submitted with your application to support the Registration Review of the above referenced product in connection with the Disodium Octaborate Tetrahydrate Interim Decision, and has concluded that your submission is acceptable.

In addition, the Agency is in receipt of your Application for Pesticide Notification under Pesticide Registration Notice (PRN) 98-10 for the above referenced product. The Antimicrobials Division (AD) has conducted a review of this request for its applicability under PRN 98-10 and finds that the action requested falls within the scope of PRN 98-10. The alternate brand name *Mil-X Mold Stop* has been added to the product record.

A stamped copy of your labeling is enclosed for your records. This labeling supersedes all previously accepted labeling. Pursuant to 40 CFR 156.10(a)(6) you must submit one copy of the final printed labeling before you release the product for shipment with the new labeling. In accordance with 40 CFR 152.130(c), you may distribute or sell this product under the previously approved labeling for 12 months from the date of this letter. After 12 months, you may only distribute or sell this product if it bears this new revised labeling or subsequently approved labeling. "To distribute or sell" is defined under FIFRA section 2(gg) and its implementing regulation at 40 CFR 152.3.

Should you wish to add/retain a reference to the company's website on your label, then please be aware that the website becomes labeling under FIFRA and is subject to review by the Agency. See FIFRA section 2(p)(2). If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process, FIFRA section 12(a)(1)(B). Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA's Office of Enforcement and Compliance.

Your release for shipment of the product constitutes acceptance of these conditions. If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6. If you have any questions, please contact me by phone at 703-308-0034, or via email at garvie.heather@epa.gov.

Sincerely,

Heather A. Garvie
Senior Regulatory Advisor

Disodium Octaborate Tetrahydrate	GROUP:	8D	INSECTICIDE/FUNGICIDE
----------------------------------	--------	----	-----------------------

TERMITE POWDER

[ABN: Mil-X Mold Stop]

For Infestation & Prevention

Kills [Wood Destroying Insects] [,] [Mold & Fungi that Cause Wood Rot]

Odorless

Non-Flammable

Effective against: Termites, Beetles (Wood Destroying), Carpenter Ants,

Wood Rot and Mold

Makes 1 Gal. - Covers 200 sq. ft.

Effective for all interior and exterior lumber, plywood, logs, and wood-form composite structural components.

For the prevention and remedial control of wood infesting organisms including: Carpenter Ants, Decay Fungi, Mold, Termites and Wood Destroying Beetles

The solution continues to penetrate deep into wood and does not break down, giving long lasting protection.

A wood preservative for protection and treatment of lumber against fungal decay and wood destroying insects including termites

For the Control and Prevention of Common Mildew and Fungus

For Both Interior & Exterior Use

Active Ingredient:

Disodium Octaborate Tetrahydrate.....98.0%
(Na₂B₈O₁₃•4H₂O)

Other Ingredients:..... 2.0%

Total 100.0%

CAUTION

KEEP OUT OF REACH OF CHILDREN

(See Directions for Use and Precautionary Statements on Back [side] Panel)

NET WT. 1b. (16 oz. / 453 g) [other sizes permitted]

[Net Wt. 8 oz. (226 g)]

[Net Wt. 2 lbs. (907 g)]

[Net Wt. 4 lbs. (1.81 kg)]

{back label}

PRECAUTIONARY STATEMENTS

Hazards to Humans & Domestic Animals

CAUTION: Harmful if swallowed. Causes moderate eye irritation. Avoid contact with eyes or clothing. Thoroughly wash with soap and water after handling. Remove contaminated clothing and wash clothing before reuse.

Personal Protective Equipment (PPE)

Some materials that are chemical-resistant to this product are barrier laminate; butyl, nitrile, neoprene and natural rubbers \geq 14 mils; polyethylene; polyvinyl chloride; and viton \geq 14mils. Applicators, mixers and other handlers must wear long-sleeved shirt, long pants, socks, shoes, chemical resistant gloves and protective eyewear.

User Safety Requirements

Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry

User Safety Recommendations

Users should:

- Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet;
- Remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
- Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing

FIRST AID

If Swallowed: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

If in Eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

If on Skin or Clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may contact the National Poison Control Center, 1-800-222-1222, day or night, for emergency medical treatment information.

Environmental Hazards

This pesticide is toxic to fish and wildlife. Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water by cleaning equipment or disposing of equipment washwaters.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

This product is a water soluble, inorganic borate salt with insecticidal and fungicidal properties effective against wood destroying organisms. Apply this product as a liquid solution. This product is an effective treatment for wood to kill and prevent infestations of decay fungi. This product may be used for preventative treatment (before signs of infestation), for wood in existing structures and for remedial treatment of infested wood in existing structures.

This product is effective for all interior and exterior wood that will be protected from excessive rain and not in direct contact with the soil. Types of wood include, but are not limited to, all types of lumber, logs and plywood. Some etching of treated wood may occur from organisms before they die. Do not apply this product to wood or cellulose material that has been painted, varnished or sealed. For best results, apply this product to bare wood. Use soap and water to clean application equipment.

Note: Spraying water on some wood species can mobilize natural wood extractives, raise the grain and leave behind calcium or other deposits. Prior to treating large areas, treat a small area with this product solution to ensure that you are satisfied with the final aesthetics.

Because of varying conditions affecting use and application, complete prevention of decay by fungi, other organisms or infestations cannot be guaranteed. This product may be used to impart a temporary resistance at these places of attack which may aid in the prevention of immediate reinfestation.

Such applications are not a substitute for mechanical alteration, soil treatment or foundation treatment but merely a supplement, particularly where use of other insecticides may pose an odor problem.

Use Precautions: Avoid contact with plant life. Harris Termite Powder or solution carelessly spilled or applied to cropland or growing plants, including trees and shrubs, may kill or seriously retard plant growth.

IN HOMES/RESIDENTIAL

Wood Treatment for wood structures such as decks, fences, steps, sheds, barns and other outbuildings.

Preparation of Treatment Solutions

10% Liquid Solution: To prepare solution, add approximately 80% of the required volume of water to the mixing vessel. While stirring, gradually add 1.0 pound of this product for each gallon of treating solution required. Add remaining water to the solution and stir until the entire product has dissolved.

Use this solution as soon as possible and do not store for an extended length of time.

Liquid Application: Use the liquid solution to control wood destroying organisms, and to kill active infestations of termites, beetles and wood decay fungi. Application may also be made by drilling and then injecting the solution under pressure into sound wood or into the insect galleries of infested wood. For remedial control of wood attacking organisms or for the protection of wood against future infestations, two applications of a 10% liquid solution is recommended.

Application Method: Solution can be applied with paint brush, roller or trigger spray bottle. Garden tank sprayer works best for attics, crawl spaces, decks, fences, logs and new construction. Wood surface must be clean, dry and unsealed before treating. Apply solution until wood surface is thoroughly wet. Avoid drilling into plumbing and/or spraying electrical installations. Any white residue can be easily removed or equipment cleaned with warm water and a mild soap solution. Wood should be completely dry (at least 48 hours) before applying paint, varnish or a waterproofing seal.

When replacing unsound wood: Treat surrounding area and all sides of new wood with 2 applications before installing.

USE RESTRICTIONS:

Use of this product for the control of bed bugs is prohibited. Applications to carpets are prohibited. Not for use with food contact surfaces, such as wood tables, cutting boards, wood countertops/butcher blocks or other surface meant for food preparation.

INSTITUTIONAL/COMMERCIAL

Wood Treatment during Construction for Prevention of Wood Destroying Organisms: Spray, foam or dust applications of this product may be made to wood after framing and roofing are in place and before insulation and drywall are installed. Apply this product in liquid solutions to all accessible surfaces of bare wood at a rate of approximately 5 gallons per 1000 square feet [ft²] of wood surface area. Do not spray electrical components or other non-wood components. Treat end-cuts of wood by application methods listed above, or by dipping end-cuts for 1-5 minutes in this product 10% liquid solution. Apply powder at the rate of 0.5 ounce [oz.] [(12-14 grams)] per square foot [ft²] to wall stud areas, box sills, roof eaves, attics and soffits.

For treatments in commercial/structural buildings: Do not apply with pressurized application methods except for use with crack, crevice, spot or void treatments.

When replacing unsound wood: Treat surrounding area and all sides of new wood with 2 applications before installing.

USE RESTRICTIONS:

Use of this product for the control of bed bugs is prohibited. Applications to carpets are prohibited. Not for use with food contact surfaces, such as wood tables, cutting boards, wood countertops/butcher blocks or other surface meant for food preparation.

Note: Correct leaks and moisture exposure that cause infestation. Wood exposed to moisture should be sealed after treatment. Not recommended for portion of wood that is in direct contact with soil. When gluing wood, treat only after glue is dry. It is recommend to perform a small patch test before general application.

RESISTANCE MANAGEMENT RECOMMENDATIONS

For resistance management, **Harris Termite Powder [this product]** contains a Group 8D insecticide. Any insect population may contain individuals resistant to **Harris Termite Powder [this product]** and other Group 8D insecticides. The resistant individuals may dominate the insect population if this group of insecticides are used repeatedly in the same fields. Appropriate resistance-management strategies should be followed.

For further information or to report suspected resistance contact P.F Harris Manufacturing at 1-800-637-0137 or at www.Pfharris.com

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal

STORAGE: Store in a cool, dry area

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER HANDLING: If empty: Do not reuse this container. Place in trash or offer for recycling if available. If partly filled: Call your local solid waste agency or 1-800-CLEANUP for disposal instructions. Never place unused product down any indoor or outdoor drain.

This container is sold by weight, NOT by volume. You can be assured of the proper weight even though some settling of contents normally occurs during transportation and handling.

Notice: Neither manufacturer nor seller makes any warranty expressed or implied concerning use of this product other than indicated on label. To the extent consistent with applicable law, Buyer assumes all responsibility for safety and use not in accordance with directions.

EPA Reg. No. 3-14

EPA Est. No. 3-GA-1 [multiple]

{Per PR Notice 2007-4, the Batch Code or Lot Number will appear on the container or labeling}

Letter in parenthesis at the end of the EPA Est. No. [indicates manufacturing location and] corresponds to the first [last] character [letter] in lot number on package [container].
