PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS - CAUTION

Harmful if swallowed. Avoid contact with eyes, skin, or clothing. Avoid breathing dust or spray. Wash thoroughly after handling. Wash contaminated clothing before reuse. Do not apply to food crops within 1 day of harvest. May cause skin sensitization in certain individuals.

STATEMENT OF PRACTICAL TREATMENT

If swallowed: Call a physician or Poison Control Center. Drink 1 or 2 glasses of water and induce vomiting by touching finger to back of throat.

If inhaled: Remove person to fresh air.

If in eyes: Flush with plenty of water. Get immediate attention.

If on skin: Remove contaminated clothing and wash affected areas with soap and water.

ENVIRONMENTAL HAZARDS

This pesticide is extremely toxic to fish. Do not apply directly to water. Runoff and drift from treated areas may be hazardous to aquatic organisms in adjacent sites. Do not contaminate water when disposing of equipment washwaters.

DIRECTIONS FOR USE

STORAGE AND DISPOSAL

Storage: Store in original container in a cool dry place which is inaccessible to children and pets, preferably in a locked area.

Container Disposal: Do not reuse empty container. Wrap container and put in trash collection.

BONIDE ROTENONE-COPPER DUST FOR POTATO-TOMATO-VEGETABLE,  
EPA Reg. No. 4-30

BONIDE ROTENONE-COPPER DUST - To control certain insects and to control or prevent certain blights, leaf spots, mildew, and certain other diseases on listed plants. For home garden use only.

DIRECTIONS

Use as a dust or spray any time when conditions are favorable, applied at 7 to 10 day intervals, as soon as plants are above ground, or as soon as insects appear. Keep foliage covered, especially new growth. In all cases repeat treatment as required (i.e., after rainfall, etc.) Do not apply to food crops within one day of harvest.

AS A DUST: This can is a squeeze type duster. Shake can to fluff powder. Press sides of can with fingers, using rapid motion for fog effect. Cover foliage with a thin film of dust, both top and undersides of leaves. Depending on foliage density, one pound should cover approximately 1,000 sq. ft.

AS A SPRAY: Mix 1 pound to 5 gallons of water, or 1 tablespoonful to 1 quart of water. Add powder to small quantity of water first making a paste, then add desired amount of water. Spray to cover all parts of exposed plant both top and undersides of leaves.

WHEN TO APPLY: FOR INSECTS, apply when insects appear and continue application weekly. Young insects and larvae are usually easier to control than adults. When blossoms are in full bloom, protect pollinators by using a fungicide only, such as BONIDE COPPER DUST. FOR DISEASE, applications should begin well before they are expected to appear. Repeat weekly and after rains.
