

Rose and Flower
SPRAY OR DUST
 W / L I N D A N E

REG. U.S. PAT. & TM. OFF. © 1971

To protect honey bees, avoid use, if possible, during periods when bees are visiting the crops. If necessary to use during such periods, warn beekeepers well in advance to locate hives at a safe distance until 1 week after application.

**NEW GREEN COLORED POWDER
 ROSE AND FLOWER SPRAY OR DUST**

ROSE SPRAY OR DUST is a combination of modern approved selected ingredients useful in controlling many common diseases and insect pests of roses and ornamentals as listed below. It can be easily applied with this container by partially crushing the sides, then squeezing and releasing rapidly in semi-upright position, to obtain a bellows duster effect, or use a portable hand duster.

For best coverage of plants with a minimum amount of waste, application should be made in the evening when there is little air movement. Dust plants lightly, but thoroughly, being sure to cover the upper and lower leaf surfaces.

DIRECTIONS

ORNAMENTALS: Diseases — On carnations, asteria leaf spot and rust. On chrysanthemums, powdery mildew and septoria leaf spot. On roses, black spot and powdery mildew.

INSECTS AND MITES — Aphids, mites, rose chafer, Japanese beetle, flea beetle, bagworms on annual and perennial flowers and deciduous and evergreen trees and shrubs.

Begin applications when pests or disease symptoms first appear or conditions favor their development and repeat at weekly intervals or as necessary to maintain control.

TO SPRAY: Mix 6 tablespoons per gallon of finished spray. Start by making gray paste (adding a little water to the powder). Strain, then add rest of water. Apply to cover all parts of plant and foliage (especially new growth) with a thin film of dust or spray.

CAUTIONS: HARMFUL IF INHALED OR SWALLOWED. Do not breathe dust. Do not take internally. Avoid contamination of feed and foodstuffs. Skin contact may be harmful. Avoid contact. In case of contact and after use, wash with soap and water. Note for Physician: Carbaryl is a moderate, reversible, cholinesterase inhibitor. Atropine is antidotal. **KEEP OUT OF REACH OF CHILDREN AND ANIMALS.**

This product is toxic to fish and wildlife. Do not reuse empty container. Burn or bury in a safe place.

Keep out of lakes, streams and ponds. Do not contaminate water by cleaning of equipment, or disposal of wastes. Apply this product only as specified on this label.
