

GARDEN DUST

GARDEN DUST FOR VEGETABLES, FLOWERS is a specially formulated insecticide and fungicide designed for consumer convenient use as a dust or spray, colored green to blend with foliage, and packed in a squeeze dustier can. Garden Dust for Vegetables, Flowers is recommended to control certain chewing, sucking and rasping insects such as certain beetles, [Mexican Bean, bean leaf, flea, striped and spotted cucumber, Colorado potato, blister and Japanese], Aphids (Melon, Potato, Chrysanthemum, Dahlia, Rose, Sweet Peas), Reduce damage by melon and pickle worms, squash vine borer, leaf rollers (before leaves fall), and diseases such as Anthracnose, powdery mildew, leaf spot, early and late blights and Septoria leaf spot, common to flowers, legumes, bfggs, melons, squash, cucumbers.

CAUTION: Stop application to food crops one day before harvest. "Keep out of any body of water. Fish may be killed."

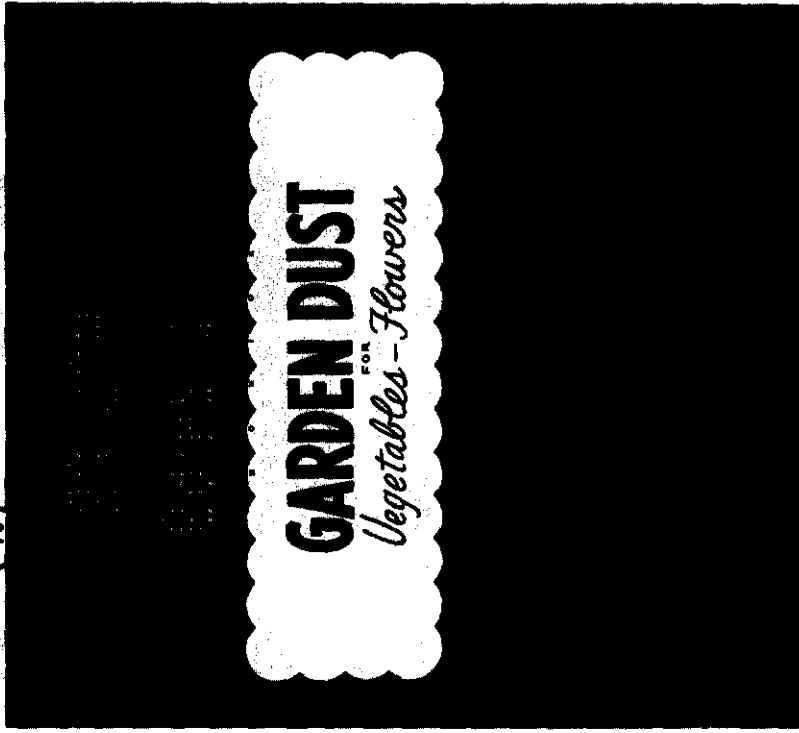

DIRECTIONS FOR HOME USE:

Stake can to fluff powder. Cover both tops and undersides of leaves with thin uniform film of dust or spray.

AS A SPRAY: Mix 2 tbsps. per quart of water, make a paste, strain, add rest of water, agitate to prevent nozzle-plugging. Repeat treatment as required, usually every 7 to 10 days. Start applying when plants leaf out in the spring before insects and diseases appear as it is easier to prevent than cure certain diseases. Try to hit as many insects as possible. Best results are obtained in early morning or evening when wind is at ebb. Avoid use during high temperatures on plants susceptible to sulphur injury, such as melons, squash, pumpkins, and related plants. Store out of reach of children and do not take internally.
