

LAWN WEED KILLER

Lawn Weed Killer can be applied any time spring, summer or fall for general weed control. Application during warm periods 60-85° when weeds are actively growing gives best results. During cool or cold periods action is slow and retreatment may be necessary. Do not apply to a new lawn until after second regular mowing.

DIRECTIONS

1. Mow lawn 2-4 days prior to application and delay mowing for three days after application.
2. Choose a calm period (to avoid wind drift of material to valuable plantings) when rain is not expected for 24 hours. Early morning when lawn is moist with dew or after a light shower or hose watering is the best time to apply.
3. Measure area to be treated and apply contents of this bag to area listed on front of bag. Weeds may be spot treated by lightly sifting direct from bag. Spreader settings for 1/4 inch wide openings will work on most spreaders but due to wear and different walking rates, adjust your spreader to avoid gross under or over dose. Other suggested spreader settings on list below. Avoid overlapping and double coverage in backing up or turning, close spreader at those times and before filling spreader. In case of accidental heavy overdose, watering the overdosed area will reduce or prevent damage.
4. Do not water the lawn after application. Twisting and loss of color of weeds within 7 days indicates effectiveness.
5. It is not essential that dead or dying weeds be raked out. Bare spots may be reseeded two weeks after application. 2 to 3 days prior to reseeding, heavily water the lawn.

CAUTION

Keep out of reach of children. Harmful if swallowed. Avoid contact with skin, eyes, or clothing. In case of contact and after use wash or flush with water.

Avoid contamination of feed, foodstuffs, fish ponds, water supplies and streams. Storage in cool dry area but not near seeds, fertilizers, insecticides or fungicides prolongs effectiveness of ingredients. Vapors from this product may injure susceptible plants in the immediate vicinity. Do not use on flowers, vegetables or ornamental beds or on Bermuda and St. Augustine grasses.
