Sevin 5% Dust
Brand Carbaryl Insecticide

Ready to Use

(PICTURE)

Insecticide for use on

Vegetables, fruit, ornamentals, dogs and cats

EPA Est. No. 4-NY-1

EPA Reg. No. 4-143

ACTIVE INGREDIENT:

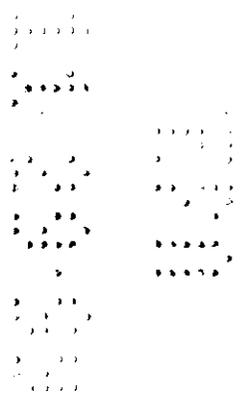

Carbaryl (CAS# 63-25-2).....	5.0%
OTHER INGREDIENTS.....	95.0 %
TOTAL.....	100%

Sevin is a registered trademark of Rhone-Poulenc Nederland B.V. for carbaryl insecticides.

KEEP OUT OF REACH OF CHILDREN
CAUTION

PRECAUTIONARY STATEMENTS-HAZARDS TO HUMANS AND DOMESTIC ANIMALS--CAUTION

Harmful if swallowed. Avoid contact with eyes, skin or clothing. Avoid breathing dust. Wash thoroughly after handling. Wash contaminated clothing before reuse. **NOTE TO PHYSICIAN:** Carbaryl is a moderate, reversible cholinesterase inhibitor. **ATROPINE** is antidotal. **NOTE TO VETERINARIAN:** Do not use this product on animals simultaneously or within 30 days before or after treatment with or exposure to cholinesterase inhibiting drugs, pesticides, or chemicals.

ENVIRONMENTAL HAZARDS:

This product is extremely toxic to bees and aquatic organisms. Do not apply directly to water. Do not contaminate water by cleaning of equipment or disposal of wastes. Do not apply while bees are actively visiting the area. Additional protective information may be obtained from your Cooperative Extension Service. Subsequent planting of food and feed crops in treated soils must be made with crops on this or other carbaryl labels.

USER SAFETY REQUIREMENTS

Wear long-sleeved shirt, long pants, shoes plus socks and household latex or rubber gloves when applying this product. Change clothing as soon as possible after use. Wash the outside of gloves before removing. As with any pesticide product, wash hands thoroughly, immediately after handling and before eating, smoking or using toilet.
Do not allow children or pets to contact treated area until dust has settled.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Wearing household latex or rubber gloves, use a dust applicator such as a shaker can, dust gun puffer or bulbous duster, rotary duster or other appropriate duster as available. Dust lightly to cover both upper and lower leaf surfaces with a thin, even film of dust. Apply when air is calm to avoid drift and contact with eyes and skin. Start applying at the farthest corner of the treatment area and work backward to avoid contact with dusted surfaces. Allow dust to settle in treated areas before reentering. For plants above-chest height, consider using a liquid carbaryl product. Do not repeat applications more than once a week.

STORAGE AND DISPOSAL

STORAGE: Store in a cool, dry area, inaccessible to children.

DISPOSAL: Do not reuse empty container. Wrap container and put in trash collection.

This product has been colored green to blend with the foliage and avoid unsightly white dust deposits.

Not for use on plants being grown for sale, or other commercial use, or for commercial seed production, or for research purposes. For use on plants intended for aesthetic, or climatic modification and being grown in interior plantscapes, ornamental gardens, parks, or on golf courses, or lawns and ground.

READ THE CAUTIONS! Make application in morning or evening when it is cool. Treat upper and lower surfaces of all foliage. Do not apply in excess. Start applications at first sign of insects. Repeat as necessary, generally at 7-day intervals, but not more often than once a week. Do not use closer to harvest than indicated following each crop. Light application should be made in seedbeds if plants show signs of insects. **Note 1:** Do not feed forage to dairy animals or animals being finished for slaughter. **Note 2:** Apply to corn silks for corn earworm control. Retreatment interval for sweet corn is 3 days. Retreatment interval for field and popcorn is 14 days. **Note 3:** Do not use on watermelon in Florida. Do not apply to melons or cucumbers when temperatures exceed 80 ° F or when vines are wet.

PHI- Preharvest Interval

	FOR CONTROL OF:	TIME TO STOP USE
BEANS	Mexican bean beetle, leaf hoppers, flea beetles, Corn earworms, Lygus bugs, stink bugs	3 day PHI (succulents) 21 days PHI (dried) 14 days PHI (forage) 21 days PHI (hay)
CARROTS:	Leafhoppers, flea beetles, spittlebugs	7 day PHI
CORN: field and pop	Corn earworm, fall armyworm, grasshoppers (See Notes 1 & 2)	14 days PHI (forage, silage) 48 days PHI (grain, fodder)
CORN: sweet	Corn earworm, fall armyworm, grasshoppers	2 days PHI (ears) 14 days PHI (forage) 48 days PHI (fodder)
BRUSSEL SPROUTS, BROCCOLI	Flea beetles, cabbage worms, harlequin bugs, Corn earworm	3 day PHI
CUCUMBERS, MELONS, SQUASH	Flea beetles, pickleworms, cucumber beetles, Squash bugs (See note 3)	3 days PHI
EGGPLANT, PEPPERS	Lace bugs, tomato hornworm	3 days PHI
HEAD LETTUCE	Leaf hoppers, stink bugs, armyworms	14 day to 15 day PHI
OKRA:	Stink bugs, corn earworm	3 day PHI
POTATOES:	Colorado potato beetles, flea beetles, leafhoppers, lygus bugs	7 day PHI
STRAWBERRIES:	Meadow spittlebug, leaf rollers, and strawberry weevil	7 day PHI
TOMATO:	Tomato fruitworm, Tomato hornworm, Flea beetles, stink bugs	3 day PHI

4/5

READ ENTIRE LABEL BEFORE EACH USE**USE ONLY ON DOGS AND CATS**

DOGS AND CATS: Fleas and ticks on dogs and cats. Use product only outside or in a well-ventilated area. Wearing household latex or rubber gloves, dust entire animal, avoiding pet's eyes, nose, mouth, and genital area. Rub or brush pet's hair to work dust down to the skin. This product should not be applied by children. Do not use on pregnant dogs or cats. Do not use on kittens or puppies under 12 weeks of age. Dust bedding and doghouse using a shaker can or other dust applicator. Do not repeat application more than once a week. Sensitivities may occur after using ANY pesticide product for pets. If signs of sensitivity occur, bathe your pet with mild soap and rinse with large amounts of water. If signs continue, consult a veterinarian immediately. In case of Emergency, call 1-800-548-2423 (Animal Poison Control Center). Consult a veterinarian before using this product on debilitated, aged, nursing or medicated animals.

ORNAMENTALS: Flowers and herbaceous plants (Japanese beetle, blister beetle, flea beetles, June beetles, Boxelder bug, mealybugs, lacebugs, plant bugs, leafhoppers, leaf rollers, psyllids, rose aphid, and exposed thrips) dust thoroughly covering both tops and undersides of leaves with light film. Repeat application as needed no more than once a week. Do not apply on Boston Ivy.

SHRUBS AND WOODY PLANTS: (Gypsy moth, scale insects, bagworm, boxwood leafminer, Japanese beetle, June beetles, rose aphid, rose slug, periodical cicada, leafhoppers, leafrollers, boxelder bug, lace bugs, mealybugs, plant bugs, thorn bug, orange tortrix, and exposed thrips), dust thoroughly covering both tops and underside of leaves with light film. Repeat application as needed but not more than once a week.

BEE, WASP, and HORNET: Using the 10 oz. Duster with snorkel tube attachment, locate the brood nest or center of the colony, if possible by listening with your ear to the wall (inside or out). Where the buzzing and clicking sound is the loudest is generally the area of the brood comb and bees.

Drill a 1/4" hole into that section of the wall from either the inside or outside and push the bit on through to clear a hole into the brood area.

Insert the snorkel tube of the Sevin 5% duster into the 1/4" hole and squeeze the duster, thus pumping the dust into the brood area. Continue squeezing until most of the insecticide dust is pumped in the wall cavity. If dust packs in the snorkel tube, remove the snorkel tube and the nozzle and shake to loosen dust. Allow 24 hours for Sevin 5% dust to completely destroy the colony after which the 1/4" hole and the outside bee entrance can be permanently sealed with wood putty or some other similar impervious material.

If it is impossible to drill a hole into the brood nest, apply Sevin 5% dust heavily around the outside entrance to the colony. Also, pump a large quantity of Sevin 5% dust into the entrance. This method will take longer to destroy the colony and may require two or three applications in order to do so.

Sevin 5% dust will also destroy wasps and hornets but heavy protective clothing, including veil and gloves, should be worn in applying Sevin 5% to the nest, as the hornets will attack savagely before the Sevin 5% dust can be applied effectively.

Stand upwind while pumping Sevin 5% dust into the entrance of the colony. Do not eat any honey taken out of the wall after bees have been destroyed with Sevin 5% dust.

For information on pesticide products (including health concerns, medical emergencies, or pesticide incidents), call National Pesticide Telecommunications Network at 1-800-858-7378.
