

To prevent orifice from plugging invert can and press discharge button briefly.

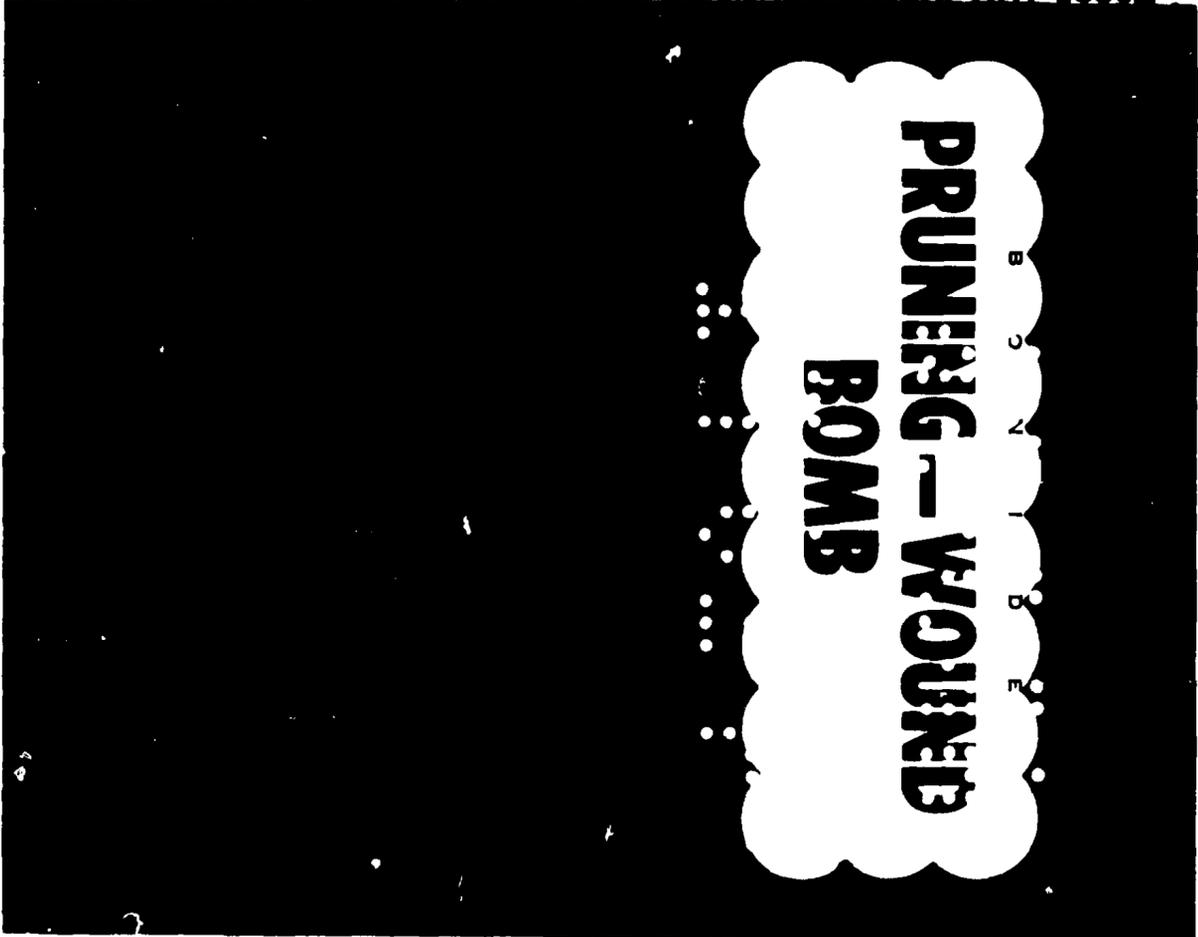

CAUTION: Avoid spraying at picket fences, buildings, clothing — will discolor or stain them. Do not apply to humans, pets, birds or plant foliage.

WARNING: Contents under pressure. Do not puncture container. Do not use or store near heat or open flame. Keep at room temperature — away from direct sunlight, radiators, stoves, hot water and other heat. Exposure of container to heat may cause bursting. Do not throw container into fire or incinerator.

Buyer's Guarantee Limited to Label Claims

USDA Reg. No. 4-147

Manufactured by **BONIDE CHEMICAL CO., INC., UTICA, N.Y. 13502**

**PRUNING - WOUND
BOMB**

READ ENTIRE LABEL AND USE ACCORDINGLY

Bonide Pruning and Wound Paint aids healing of cuts, grafts, scrapes, bruises and wounds of woody plants and trees by stopping entry of moisture and wood rotting diseases. It prevents excessive sap flow and acts as barrier to wood boring insects. May also be used to waterproof planting pots, wooden tubs, canvas etc.

DIRECTIONS

When pruning heavy branches partially undercut, first, to prevent splitting or tearing bark into limb or trunk. Trim off stumps of branch as close as possible to main branch or trunk. Thoroughly cover exposed areas of cut.

When repairing wounded, damaged or decayed areas; cut away rotten or decayed material to sound wood and/or form an oval shaped cut parallel with trunk or branch that promotes rainwater drainage. Thoroughly cover exposed areas of cut. Inspect treated areas periodically, brush clean and recoat if necessary. Avoid recoating new callus (healed edges) which may have formed.

Roses and ornamentals: Treat pruning cuts over 1/2" in diameter.

Fruit and Shade Trees: Treat pruning cuts over 1" in diameter.

Waterproofing: To seal small cracks and holes, make two applications, allowing first to dry overnight.

Shake thoroughly, remove cap, hold bomb upright with nozzle opening pointed at, and 6 to 8 inches from surface to be treated. Push button down to spray.
