# LAWN CHINCH BUG CONTROL

LAWN CHINCHBUG CONTROL WEAPON is an organophosphorous soil insecticide of limited duration or after effect. It is formulated on granules for easy application. Use precautions. Avoid dust to adjoining food and/or forage crops. Clean up spills on walks and/or patios.

## DIRECTIONS

**LAWNS & ORNAMENTAL TURF:** To control chinch bugs Apply contents of this bag 4 lbs. per 1,000 sq. ft. Immediately after application, drench with water or sprinkle thoroughly. Do not allow persons or pets on treated lawn until completely dry. The following suggested spreader settings are approximate. Adjustments must be made for condition of the spreader, rate of walk and humidity/moisture conditions.

Since most machine manufacturers use only whole numbers, fractions will have to be estimated between the whole numbers. Increasing numbers usually equals faster rate of application. Close shut off on turns, push shut off open when starting. Keep machine handle low or container of machine vertical to ground level. Adjustments will seldom exceed 1/2 number.

<u>SPREADER</u>	<u>MODEL</u>	<u>SETTING NO.</u>
Patco	P220 thru P324	7 1/2
Lawn Beauty	18 & 24	7 1/2

## WARNING

Keep out of reach of children. May be fatal if swallowed. Avoid breathing dust. Do not get in eyes, on skin or on clothing. In case of contact and after use on skin, wash with soap and water. In eyes, immediately flush with plenty of water. Do not contaminate food or feeding dishes of pets or animals.

This product is toxic to fish. Keep out of lakes, streams or ponds. Do not contaminate water by cleaning of equipment, or disposal of wastes. Apply this product only as specified on this label.

Burn or bury empty bag in a safe place. Keep out of smoke.
