Contains  
\*SEVIN - FOLPET - \*KELTHANE

White thru red----- CONTROLS DISEASES AND INSECTS

EPA Est. No. 4-NY-1

EPA Reg. No. 4-185

ACTIVE INGREDIENTS:

Folpet(N-[trichloromethylthio]phthalimide).....	6.5%
*Carbaryl(1-naphthyl N-methylcarbamate).....	4.0%
Methyl Naphthalenes.....	1.9%
Aromatic Petroleum Derivative Solvents.....	1.1%
**1,1-bis(p-chlorophenyl)-2,2,2-trichloroethanol.....	1.0%
Malathion(O,O-Dimethyl dithiophosphate of diethyl mercaptosuccinate).....	1.0%
INERT INGREDIENTS.....	84.5%

NET WEIGHT 1 LB.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION

Harmful if swallowed, inhaled, or absorbed through the skin. Do not breathe dust. Avoid contact with skin, eyes, or clothing. Keep out of reach of children and animals.

STATEMENT OF PRACTICAL TREATMENT

- If swallowed - Call a physician or Poison Control Center immediately. Do not induce vomiting. Do not give anything by mouth to an unconscious person.
- If inhaled - Remove victim to fresh air.
- If on skin - Remove contaminated clothing and wash affected areas with soap and water.
- If in eyes - Flush with plenty of water. Get medical attention immediately.

Note for Physician: Carbaryl is a moderate, reversible, cholinesterase inhibitor. Atropine is antidotal.

ENVIRONMENTAL HAZARDS

This product is toxic to fish, birds and other wildlife. Do not apply directly to lakes, streams and ponds. Do not apply where runoff is likely to occur. Do not apply when weather conditions favor drift from areas treated. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply the product only as specified on this label. This product is highly toxic to bees exposed to direct treatment or residues on plants. Protective information may be obtained from your Cooperative Agricultural Extension Service.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with the labeling.

DISPOSAL

Do not reuse empty container. Wrap container and put in trash collection.

**GREEN TINTED POWDER  
ROSE AND FLOWER SPRAY OR DUST**

ROSE SPRAY OR DUST is a combination of modern approved selected ingredients useful in controlling many common diseases and insect pests of roses and ornamentals as listed below. It can be easily applied with this container by partially crushing the sides, then squeezing and releasing rapidly in semi-upright position, to obtain a bellows duster effect, or use a portable hand duster.

For best coverage of plants with a minimum amount of waste, application should be made in the evening when there is little air movement. Dust plants lightly, but thoroughly, being sure to cover the upper and lower leaf surfaces.

**DIRECTIONS**

**ORNAMENTALS: Diseases** — On carnations, alternaria leaf spot and rust. On chrysanthemums, powdery mildew and septoria leaf spot. On roses, black spot and powdery mildew.

**INSECTS AND MITES** — Aphids, mites, rose chafers, Japanese beetle, flea beetle, bagworms on annual and perennial flowers and deciduous and evergreen trees and shrubs.

Begin applications when pests or disease symptoms first appear or conditions favor their development and repeat at weekly intervals or as necessary to maintain control.

**TO SPRAY:** Mix 6 tablespoons per gallon of finished spray. Start by making gravy paste (adding a little water to the powder). Strain, then add rest of water. Apply to cover all parts of plant and foliage (especially new growth) with thin film of dust or spray.
