BONIDE LAWN AND ORNAMENTAL INSECTICIDES  
W/DURSBAN\* 2E, EPA Reg. No. 4-300

**FIRE ANTS:** Mix at the rate of 1 fl. oz. per 2 gal. water, and apply 1 gal. of solution per mound. Thoroughly wet the mound and surrounding area to a 4 ft. diameter. For best results, apply in cool weather (65-80°F), or in early morning or late evening hours. Treat new mounds as they appear. Application should be as a gentle rain from a sprinkler can or using low pressure spray since pressurized sprays may disturb the ants causing migration and reducing product effectiveness.

Recommendations for use of this product are based upon tests believed to be reliable. The buyer must assume all responsibility for use of this product when not used in strict accordance with directions or established safe practice, or when used under abnormal conditions not reasonably foreseeable to the seller.
