

Bonide Systemic Spray kills aphids, birch leaf miners, leaf hopper, mites, thrips, white flies on ornamental flowers, shrubs, and ornamental trees.

Bonide Systemic Spray kills aphids, mites, white flies, thrips, and birch leaf miners that come in direct contact with spray deposit. Also when spray solutions are applied to plant foliage, they are absorbed into the plant and kill sucking mites and aphids that feed on the plant juices.

Bonide Systemic Spray mixes readily with water and may be used with Bonide Resettin if and when necessary. Applications should be made with a good sprayer before insects appear, when seen feeding on plant foliage.

**HOW TO USE TO CONTROL INSECTS LISTED**

Diagnose: 2-3 teaspoons of Bonide Systemic Spray per 1 gallon of water and apply with a continuous air pressure sprayer and spray plants until they are thoroughly wet. Repeat as needed.

For house and garden sprayers add 2-3 tablespoons of Bonide Systemic Spray for each gallon of final spray mixture. To prepare 1 gallon of final spray solution, pour 2-3 fluid ounces of tablespoons of Bonide Systemic Spray into sprayer tank and fill with water to the 1 gallon mark. Shake well and spray plants thoroughly wet. Repeat as needed.

Always read entire label before use. For more information see price tag.
