RE: Bonide Moletox II
EPA Reg. No. 4-285

Notification – Additional Brand Names: Got Pests... Get Revenge Moletox Mole & Gopher Killer & Moletox Mole & Gopher Killer

To Whom It May Concern:

Enclosed, please find a completed form 8570-1, Notification and the latest final printed label for the above-mentioned registration. Changes are in red text. I trust you will find everything in order for approval.

This notification is consistent with the provisions of PR Notice 98-10 and EPA regulations at 40 CFR 152.46, and no other changes have been made to the labeling or the confidential statement of formula of this product. I understand that it is a violation of 18 U.S.C. Sec. 1001 to willfully make any false statement to EPA. I further understand that if this notification is not consistent with the terms of PR Notice 98-10 and 40 CFR 152.46, this product may be in violation of FIFRA and I may be subject to enforcement action and penalties under sections 12 and 14 of FIFRA.

Should you have any questions or require additional information, please do not hesitate to contact me at (315) 736-8231, extension 230 or by e-mail at Nicoler@bonide.com.

Sincerely,

Nicole R. Weimer

TOTAL.....100.00%

KEEP OUT OF REACH OF CHILDREN

CAUTION

See back/side/other panel(s) for additional Precautionary Statements & First Aid.

NET WEIGHT: 1 LB / 8 OZ / 3 ½ OZ

5/6

FIRST AID

If swallowed	Call a poison control center or doctor immediately for treatment advice. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give any liquid to the person. Do not give anything by mouth to an unconscious person.
If on skin or clothing	Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.
If inhaled	Move person to fresh air. If person is not breathing, call 911 or ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.
If in eyes	Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

Have the product container or label with you when calling a poison control center or doctor or going for treatment. You may also contact 1-877-854-2494 for emergency medical treatment information. If you experience signs and symptoms such as nausea, abdominal pain, tightness in the chest, or weakness, see a physician immediately. For information on pesticide products (including health concerns, medical emergencies, or pesticide incidents) call the National Pesticide Information Center at 1-800-858-7378.

TREATMENT FOR PET POISONING: If animal eats bait, call veterinarian at once.

NOTE TO PHYSICIAN OR VETERINARIAN: Contains phosphine-producing active, Zinc Phosphide. Probable mucosal damage may contraindicate the use of gastric lavage. For animals ingesting bait and/or showing poisoning signs, induce vomiting by using hydrogen peroxide. Sodium bicarbonate can be given orally to neutralize the stomach acidity. The stomach and intestinal tract can be evacuated, oxygen administered and cardiac and circulatory stimulants given.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS - CAUTION

Harmful if swallowed or absorbed through the skin. Avoid contact with eyes, skin or clothing. Wear long-sleeved shirt and long pants, shoes plus socks, and waterproof gloves. Wash hands thoroughly with soap and water before eating, drinking, chewing gum, using tobacco or using the toilet. Remove contaminated clothing and wash clothing before reuse. Any person who retrieves carcasses or unused bait following application of this product must wear waterproof gloves.

ENVIRONMENTAL HAZARDS

This product is extremely toxic to birds, fish and other wildlife. Wildlife feeding on treated bait may be killed. Dogs, cats, and other predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten this bait. Do not apply directly to water.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

STORAGE & DISPOSAL

Pesticide Storage: Store and transport in original container only in an upright position, and in a dry place inaccessible to children and pets.

Pesticide Disposal: Nonrefillable container. Do not reuse or refill empty container. *If empty*—Place in trash or offer for recycling if available. *If partially filled*--Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

6/6

USE RESTRICTIONS: Do not apply to any site, to any pest, or by any method not specified on this label. This product may only be used to control moles and pocket gophers in manual, below ground applications in lawns. Bait must be applied directly into burrow systems. Do not apply in gardens and areas where food or feed may be contaminated. Do not apply this product by use of an artificial burrow builder. Not to be sold in individual containers containing more than 1 pound of product.

Specific directions for moles. The presence of moles may be indicated by a network of surface ridges in the turf, by a series of conical mounds of earth pushed up from deep burrows, or by damage to flower bulbs.

Surface Ridges. Prior to treatment determine which burrows are active according to one of the following two methods. Either press down a small section of the tunnel or remove a one inch section of the tunnel's roof. Mark these sections and recheck in 24 hours. The burrow is considered active if the flattened runway has been raised up or if the roof has been repaired. Only treat active burrows.

Carefully punch a hole in the top of active tunnels, drop a teaspoonful amount of Moletox and carefully close the hole with sod or stone. Do not collapse the runway again or allow loose soil to cover the bait. After a few days check to see if the burrows are still active according to one of the two methods described above. If so, repeat treatment.

Conical Mounds. Remove center plug from the conical mounds with aid of a long-handled spoon and drop a teaspoonful amount of Moletox into the underground tunnel. Close opening with rock or sod. Do not allow loose dirt to cover bait.

Specific directions for flower bulb protection. Pack about one-quarter inch of soil against each bulb. Place several baits at sides of and around the bulb. Then cover.

Specific directions for pocket gophers. Burrowing pocket gophers (*Thomomys* spp and *Geomys* spp) throw out low, fan shaped mounds on either side of their underground tunnel. These lateral tunnels coming to the surface are on the flat side of the fan and are plugged with soil. With a long-handled spoon carefully remove the plug. Insert a teaspoonful of Moletox as far down as possible. Reclose opening, being careful not to cover bait with soil.

FOLLOW-UP: Wearing waterproof gloves, collect and dispose of all dead, exposed animals. Dispose of leftover bait in accordance with disposal instructions. Use detergent and hot water to wash spoons. Do not use spoon for mixing, holding or transferring food or feed.

DISCLAIMER: To the extent consistent with applicable law, the buyer must assume all responsibility for use of this product when not used in strict accordance with directions or established sale practice, or when used under abnormal conditions not reasonably foreseeable to the seller.

For information on pesticide products (including health concerns, medical emergencies, or pesticide incidents), call the National Pesticide Information Center at 1-800-858-7378.
