## LAWN FLEA AND TICK CONTROL

To kill fleas and ticks harboring in lawns and backyards, use this concentrate in a hose-end sprayer. Place required amount of concentrate in sprayer jar (see chart below) and fill with water to the recommended level. Mix well. Attach to sprayer and spray as recommended.

*[when packaged in Hose-End sprayer]*

### **HOSE END SPRAYER: Easy to Use**

*Make sure knob control lever is in the OFF position. Shake well and attach to hose. Turn water on at faucet, aim nozzle toward lawn and turn knob control lever to ON to begin spraying. When finished turn Control lever to OFF position. Turn faucet to OFF position. Discharge residual water pressure by turning ON and OFF again. Store out of reach of children.*

For best results, lawn should be mowed a day or two before spraying.

Spray using a slow, even sweeping motion, being sure to cover the entire lawn surface. Spray under ornamentals and trees, but avoid soaking young or flowering plants. Repeat treatments may be necessary at 7 to 14 day intervals. Kills on contact with Ixodes dammini tick (deer tick), which may transmit lyme disease. Also kills foraging fire ants upon direct contact. A registered fire ant mound treatment should also be used in conjunction with this product.

Keep pets and children out of treated areas until after the spray has dried. Do not spray animals. Dogs, cats, their kennel or bedding area should also be treated with a registered flea and tick control product in conjunction with application. [This one quart (32 fl. oz.) container covers 16,000 sq. ft. (100' x 160')]

### HOSE-END SPRAY APPLICATION

2 fluid ounces	6 gallons	1,000 sq.ft. (50'x20')
4 fluid ounces	12 gallons	2,000 sq.ft. (50'x40')

Use 16 fluid ounces of concentrate per gallon of water and apply as a coarse wet spray at the rate of 1 gallon per 1,000 square feet.

[This one quart (32 fl. oz.) container will treat a 3 foot wide area for a length of 667 feet (3' x 667').]
