OUTDOORS:

Triple action instant knockdown formula. To kill Wasps, Hornets, Yellow Jackets, and [REDACTED] under eaves, screens, window frames, doors, patios, cracks, holes or crevices wherever insects are noticed spray for about 1-2 seconds or until surfaces are moist. To prevent entrance of insects into the house spray around points where insects enter such as outside plumbing, faucets, etc., and cracks or crevices in foundation as well as along sills and ledges.

For best results, spray in early morning or late evening when insect activity is minimal. Stand a safe distance from nest and not directly underneath. (Remove protective cap.) Hold can upright and point spray opening toward nest with wind at your back. Spray until nest is thoroughly saturated to kill the entire nest population. Residual actions will kill wasps and hornets returning to the nest. Wait at least 24 hours before removing the nest.

Mud Daubers: Spray directly on insects and their nests from approximately 2 feet away. Applications should be made in late evening when insects are at rest. Spray into hiding and breeding places contacting as many insects as possible.

Do not apply or contaminate feed, foodstuffs, dishes or utensils. Avoid Spraying vegetation directly.
