DRAGON  
72% CHLORDANE SPRAY  
CONTROLS TERMITES

16-96

ACTIVE INGREDIENTS	By Wt.
Technical Chlordane*	72%
Xylene - range aromatic solvent	25%
INERT INGREDIENTS	5%
	<hr/> 100%

\*Equivalent to 45.2% Octachloro - 4, 7 Methanotetrahydroindane and 20.6% related compounds.

KEEP OUT OF REACH OF CHILDREN

WARNING

STATEMENT OF PRACTICAL TREATMENT

IF SWALLOWED Call a physician or Poison Control Center immediately. Drink one or two glasses of water and induce vomiting by touching back of throat with finger. Repeat until vomit fluid is clear. Do not induce vomiting or give anything by mouth to an unconscious person.

IF INHALED Remove victim to fresh air. Apply artificial respiration if indicated.

IF ON SKIN Remove contaminated clothing and wash affected areas with soap and water.

IF IN EYES Flush eyes with plenty of water. Get medical attention immediately.

**72% CHLORDANE SPRAY**

16-96 2 83

READ ENTIRE LABEL. USE STRICTLY IN ACCORDANCE WITH LABEL CAUTIONS, WARNINGS AND DIRECTIONS; AND IN CONFORMITY WITH FEDERAL AND STATE REGULATIONS

**PRECAUTIONARY STATEMENTS  
HAZARDS TO HUMANS  
AND DOMESTIC ANIMALS**

**WARNING**

May be fatal if swallowed. Do not breathe vapor or spray mist. Do not get on skin. In case of contact, wash immediately with soap and water. Do not contaminate feed or food stuffs. Keep out of reach of children. Keep children and pets off treated areas until this material is washed into soil and area is dry. Do not use on household pets or humans.

**ENVIRONMENTAL HAZARDS**

This product is toxic to fish and wildlife. Do not apply directly to water. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.

**PHYSICAL HAZARD**

Do not use or store near heat or open flame.

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**STORAGE & DISPOSAL**

Store in original container away from feed and foodstuffs. Do not store diluted spray. Make new dilution for each use. Do not reuse empty container. Wrap container and put in trash collection.

**RECOMMENDED MIXTURES - DIRECTIONS FOR HOMEOWNER USE**

Use a 1.0% concentration ( 1 pint of 72% Chlordane Spray diluted with 12 gals. water).

**SPRINKLE CONTROL IN EXISTING STRUCTURES - Buildings with basements or crawl spaces.**

First remove all wood debris and wood forms. Around piers, pipes, chimney bases and along foundations of poured concrete dig a trench 6 inches wide and 4 inches deep. For brick and block foundations dig the trench about 12 inches deep. If footing is more than 12 inches deep, make holes with a crowbar, pipe or a rod about one foot apart that extend from the trench bottom to the top of the footing. Make holes closer in hard-packed clay soils. NEVER DIG BELOW THE TOP OF THE FOOTING. Apply the emulsion (or solution) in the trench at a rate of 4 gallons per 10 linear feet per foot of depth. Apply half of this to the back-fill. Likewise, treat along the inside of foundations of crawl-space buildings. Cover treated soil with a thin layer of untreated soil.

For raised porches, terraces, and entrance slabs, drill holes at one foot intervals, 6 inches from the foundation, and pour one-half gallon of emulsion (or solution) into each hole. Refill holes. Slabs with heat ducts or

radiating heat pipes should be treated by commercial pest control operator.

The object is to establish a treated soil barrier which will prevent termite entry. Other critical areas may also require treatment, particularly if there are inaccessible areas, basements or slab-type construction. It is suggested that you contact the Agricultural Cooperative Extension Service for advice or consult a Commercial Pest Control Service.

Avoid contamination of public and private water supplies by following these precautions. Do not allow a hose or any type of faucet extension to reach into the termite chemical solution while filling or mixing this material with water. Use anti-back-flow or anti-siphonage equipment on all filling equipment. These devices can be purchased at hardware or plumbing stores. Use of anti-back-flow equipment will help to insure that this toxic chemical will not contaminate domestic water supplies. Refer to Federal (Federal Housing Administration), state, and local specifications for safe distances of treatment areas from wells. Soil in the vicinity of wells, cisterns or ponds should not be treated if it is water saturated, subject to excessive saturation due to an accumulation of water, or if the soil to be treated around the perimeter of the structure is at a grade lower than surrounding yard or property area. In this case the application technique follows: Do Not Apply Under Pressure. Soil should be removed from area from well or domestic water contamination, treated, allowed to dry and undisturbed for two to four hours then returned to trench which has been lined with 4 mil. plastic sheeting. Be careful not to puncture the plastic sheeting when returning soil to the trench. Do not treat structures that contain cisterns or wells.

#### RETREATMENT RESTRICTIONS

1. Retreatment for subterranean termites should only be made when there is evidence of reinfestation subsequent to the initial treatment, or there has been a disruption of the chemical barrier in the soil due to construction, excavations, landscaping, etc.
2. Retreatment may be made to critical areas in accordance with the application techniques described above. This application should be made as a spot treatment to these areas.

Routine retreatment of the entire premises should be avoided.

#### NOTICE

Buyer assumes all risks of use, storage or handling of this material not in accordance with DIRECTIONS FOR USE and WARNINGS stated on this label.

Mr. James Wilson  
Dragon Chemical Corporation  
P.O. Box 7311  
Manassas, VA 24019

Dear Mr. Wilson:

Subject: Termiticide L.I.P.  
Dragon 72% Chlorfane Spray  
EPA Registration No. 16-96  
Your Application Date: November 13, 1982

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act, (FIFRA), is acceptable provided that you make the changes listed below before you release the product for shipment bearing the amended labeling:

1. Delete "CAUTIONS" after "Use strictly in accordance with label" at the top of the back panel.
2. Delete "(or solution)" wherever it appears in the Directions for Use. This phrase was present in the labeling guide only for assistance in label preparation for registrate whose product is a solution rather than an emulsion.
3. Please refer to the enclosed type size guide for assistance in selecting the correct print size for the front panel signal word, child hazard warning, and the heading "Storage and Disposal."

Please submit five (5) copies of your revised final printed labeling before you release the product for shipment.

Your request to exhaust current label supply is acceptable. Since you will have labels for product release, we recommend that you submit an amendment during this time to change the product name to something like "Dragon 72% Chlorfane Spray for homeowners," because you have two products (EPA Registration No. 16-96 and 15-116) with identical names even though one is for homeowners and the other is for servicemen. Acceptance of the changed product name will enable printing the revised labels with the new distinct name.

Sincerely yours,

George T. LaRocca  
Product Manager (15)  
Insecticide-Rodenticide Branch  
Registration Division (15-767)
