present or to intertidal areas below the mean high water mark. Do not contaminate water by cleaning  
of equipment or disposal of wastes. This product is highly toxic to bees exposed to direct treatment or  
residues on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops  
or weeds if bees are visiting the treatment area. Protective information may be obtained from your  
Cooperative Agricultural Extension Service.

**GENERAL INFORMATION: FOR HOMEOWNER USE ONLY.** DRAGON® 10% SEVIN® DUST  
controls a wide range of insect pests. At first signs of insect infestation, preferably before damage from  
feeding occurs, apply thoroughly to upper and lower leaf surfaces. If needed, repeat application every  
7-10 days. DO NOT use with lime or other alkaline material. May be applied up to harvest except where  
noted.

**STAINING PRECAUTION:** Staining may occur on certain surfaces such as stucco, brick, cinder block,  
wood, fabrics and carpet. Deposits on painted or stained surfaces or finishes (e.g., cars, house trailers,

surfaces where visible residues are objectionable. Staining of fabrics and carpet may be permanent.

## DIRECTIONS

It is a violation of federal law to use this product in a manner inconsistent with its labeling. Subsequent planting of food and feed crops in treated soil must be made with crops on this or other carbaryl labels.

## VEGETABLES

**BEANS:** For Mexican bean beetle use  $\frac{1}{4}$  lb. per 2000 sq. ft. For Bean leaf beetle, Cucumber beetles, Flea beetles, Japanese beetles, Leafhoppers, Velvet bean caterpillar and Western bean cutworm, use  $\frac{1}{4}$  lb. per 1000 sq. ft. For Armyworms, Corn earworms, Stink bugs and Tarnished plant bug, use  $\frac{1}{4}$  -  $\frac{1}{2}$  lb. per 1000 sq. ft. Use up to the day of harvest. **DO NOT** feed treated vines to domestic animals.

**CORN:** For Corn earworm, Corn rootworm adults, European corn borer, Fall armyworm, Flea beetles, Japanese beetle, Sap beetles and Leafhoppers, use  $\frac{1}{4}$  -  $\frac{1}{2}$  lb. per 1000 sq. ft. For Corn earworm, apply to silks as soon as they appear. Make 3-4 applications at 2-3 day intervals. Re-apply immediately after rain. For Corn Borer and larvae in whorls (budworm damage) and for foliage feeders, apply thoroughly into the whorls when plants are about knee high. Repeat at weekly intervals until control is achieved. Allow 7 days before harvest, or before allowing domestic animals to feed in treated areas. Application of this product to the tassel of corn during the pollen shed period will seriously reduce bee populations.
