

KILL GOPHERS TOO!

KILL
mice

ACTIVE INGREDIENTS: Strychnine Sulfate 0.5%.
INACTIVE INGREDIENTS 99.5%

POISON

USDA Reg.
No. 30.5

Net Weight 1 1/4 Ounces

ANTIDOTE: If less than ten minutes has passed since the poison was taken, give a tablespoonful of salt in a glass of warm water. Have victim lie down in a quiet, darkened room and keep him warm. Call a Physician immediately!
Warning: Convulsive Poison! Do not contaminate feed and foodstuffs. Keep away from children and domestic animals.

W. R. SWEENEY MFR., INC. • SALISBURY, MO.

DIRECTIONS FOR USE

HOUSE MICE Place teaspoonful quantities in secluded spots about the perimeter of the room, not accessible to children and pets. House mice do not travel far from nests, so baits should be spaced 10 to 15 feet apart.

FIELD MICE Meadow mice, pine mice and cotton rats build networks of surface trails under cover of vegetation. Place teaspoonful quantities of bait directly in these trails at three different locations about the base of orchard trees. Cover bait spots to protect birds and to provide secluded spots for feeding.

POCKET GOPHERS Open lateral tunnels to underground runways by removing soft earth plug at newest earth mound. Insert teaspoonful of grain by means of long-handled spoon well down into burrow. Close hole with wad of grass and cover with dirt, using care not to let dirt cover bait.

GROUND SQUIRRELS Scatter teaspoonful quantities on bare ground within two feet of the burrow opening. Warning: Small seed-eating birds may be endangered.
