**GENERAL WASHING DIRECTIONS FOR
WHITE AND FAST COLORED COTTON,
LINEN AND NYLON**

IN WASHING MACHINE: CAROL works equally well in standard or automatic washers and does NOT harm porcelain linings, metal parts, rubber or glass. CAROL works fine with the latest laundry detergents as well as wash soap. Use 1/2 cup CAROL for 5 gallon or front-loading washers; 1 cup for 10 gallon or top-loading washers. Never pour in onto clothes without first diluting the CAROL in a half gallon of water. Start washer promptly. CAROL really WHITENS whites, plus sanitizing and deodorizing.

YELLOWING: Occasionally an article which appears to be white cotton turns yellow.

This is the chemical effect of chlorine on a certain type of resin coating on the cloth applied at the mill when manufactured. Newer coatings now being used do not have this fault. When it does occur, the article may be whitened again by using NEW RIT COLOR REMOVER according to directions. It is available at Drug Stores.

COLORED CLOTHES: After finishing white clothes, colored clothes, if fast colors, may be safely washed in the same water, as bleach action is used up by each batch of clothes.

BABY CLOTHES, DIAPERS, BEDDING: Use CAROL as above directions, with your regular laundry soap or detergent. No pre-soaking. Rinse thoroughly. Removes stains, deodorizes, sanitizes.
