ONE U. S. GALLON — 3.785 LITERS

WARNING

Keep out of the reach of children.

Keep away from heat and open flame. Avoid contact with skin. Do not breathe vapor or spray mist. Do not get in eyes or on clothing. Close container after each use. Use with adequate ventilation. Harmful if swallowed or absorbed through the skin. May produce severe burns. Do not induce vomiting. Call physician immediately. Before smoking or eating and after using, clean hands thoroughly. Do not contaminate water by cleaning of equipment or disposal of waste and containers. Do not reuse container, destroy when empty.
E.P.A. Reg. No. 43-58

Cabot's GYPSY-MOTH CREOSOTE — A Sterilizing Black Liquid that Penetrates the Nest and Kills the Eggs — Prevents the Hatching of the Destructive Caterpillars.

Cabot's Gypsy-Moth Creosote, especially formulated by the Cabot's Laboratory in conjunction with the Massachusetts Gypsy Moth Commission, is used by State Foresters and Municipal Tree Wardens and is the standard for the Nation.

It penetrates completely through the nest and kills all the eggs. It is a black liquid which flows freely at all temperatures and never gets thick or viscous in the winter.

SPECIFICATIONS:

1. It is painted onto the nests with a brush or dauber. Saturate the nest so that the liquid will penetrate through and kill all the eggs.
2. It is black so that when a nest has been treated, it shows — thus avoiding the danger of overlooking any nests or going over the same nests twice.
