## WEST

USDA Reg. No. 52-52

manufactured by

**WEST CHEMICAL PRODUCTS, INC.**  
 42-16 WEST STREET LONG ISLAND CITY, N. Y. 11101

### DIRECTIONS FOR USE:

#### CONTACT SPRAYING:

**For Cockroaches and Certain Other Crawling Insects:** Apply WEST INSECTICIDE at one (1) gallon per 1000 square feet to all harborages and breeding areas -- cracks, crevices, dark, protected warm and humid places. Where possible spray WEST INSECTICIDE directly on the insect pests. Thorough application should be made to walls, under surfaces of sinks, work tables, garbage areas, baseboards, escutcheon plates, window and door frames, void spaces, etc.

**For Flour, Cereal and Grain Insects:** Clean bins, elevator boots, spouts, and machines to remove all farinaceous material. Apply WEST INSECTICIDE with a WEST 124-S SPRAYER to all cracks, crevices, harborages and breeding areas as a contact spray to kill accessible stages of the insects.

Apply WEST INSECTICIDE at a rate of one (1) gallon per 1000 square feet. Also treat walls and floor perimeters with WEST INSECTICIDE. Do not spray directly on food stuffs. Repeat as necessary.

#### SPACE SPRAYING:

Use the WEST SPACEMASTER JET FOGGER or the WEST 1600 FOGGER. Turn off all ventilating equipment, close all windows and doors.

**For Flying Insects** -- apply one pint of WEST INSECTICIDE per 10,000 cubic feet.

**For Crawling Insects** -- apply one quart of WEST INSECTICIDE per 10,000 cubic feet.

To obtain maximum results, keep the treated area closed as long as possible after fogging.

CLASSIFIED BY UNDERWRITERS LABORATORIES, INC. AS TO FIRE HAZARD ONLY. WEST INSECTICIDE CLASSIFIED 20 TO 25 BETWEEN PARAFFIN OIL AND KEROSENE IN RESPECT TO FIRE HAZARD. SEE U.L. INDEX OF CLASSIFIED PRODUCTS.
