FORMULA 4216 is a g

DIRECTIONS FOR USE: For cleaning and disinfection in a single operation, use three (3) ounces of FORMULA 4216 in five (5) gallons of water. Use a scrub brush to insure thorough cleaning. For porous surfaces, use six (6) ounces of FORMULA 4216 in five (5) gallons of water.

GERMICIDAL INDICATOR: FORMULA 4216 provides a color change to indicate germicidal activity. In use dilution, it is colorless. Just as long as color remains in this solution, germicidal action is assured. Once color disappears, the solution should be discarded.

HOSPITAL USE: Use three (3) ounces of FORMULA 4216 in five (5) gallons of water (75 PPM titratable iodine) for disinfection of rubber sheets and rubber gloves (5 minutes contact recommended.)

NLY

formula 4216

FORMULA 4216 is a general purpose "Tamed Iodine"[®] detergent germicide applicable for a variety of uses

DIRECTIONS FOR USE: For cleaning and disinfecting most surfaces in a single operation, use three (3) ounces of FORMULA 4216 to five (5) gallons of water. Use a scrub brush or suitable device to insure thorough cleaning. For porous surfaces or those difficult to clean, use six (6) of ounces of FORMULA 4216 to five (5) gallons of water.

GERMICIDAL INDICATOR: FORMULA 4216 is its own indicator of germicidal activity. In use dilution, it exhibits an amber color. Just as long as color remains in this solution, complete and rapid germicidal action is assured. Once color has disappeared, the solution should be discarded.

HOSPITAL USE: Use three (3) ounces of FORMULA 4216 to five (5) gallons of water (75 PPM titratable iodine) for thermometer disinfection, isolation and terminal disinfection procedures, disinfection of rubber sheets and rubber gloves, tubing and catheters. (5 minutes contact recommended.)

SURGICAL INSTRUMENTS: Remove all adhering blood and serous exudates by cleaning with a solution containing 3 ounces of FORMULA 4216 to 5 gallons of water. After cleaning, soak in a similar solution for at least 15 minutes.

SCHOOL USE: For the maintenance of public sanitation, it is suggested that FORMULA 4216 be employed for the cleansing and disinfection in one application of: walls, floors, desks, etc. as well as its utilization in shower rooms, locker rooms and washrooms.

GENERAL USE: This material should be used to clean (and disinfect) floors, walls, furniture, Venetian blinds, metal cabinets, drinking fountains, etc.

CAUTION: Harmful if swallowed. May cause skin and eye irritation. Avoid contact with skin, eyes or clothing. If in contact, wash thoroughly with water. If irritation persists, get medical attention. Avoid contamination of foods and feeds.

Rinse empty container thoroughly with water and discard it.
