LONG LASTING NON-SELECTIVE WEED KILLER

**ACTIVE INGREDIENT:**

Monuron [3-(p-chlorophenyl)-1,1-dimethylurea] trichloroacetate

12.47%

**INERT INGREDIENTS:**

87.53%

100.00%

ASSAULT weed killer may be used for the control of most annual and perennial grasses, broad-leaved weeds, and general weed control on non-crop land such as: right of ways, industrial plants, lumber yards, tank farms, schools, storage areas, parking lots and similar areas. Best results will be obtained if ASSAULT is applied shortly before or at the time plant growth begins. Thorough watering after application will cause the material to move to the root zone and thus speed up control. The effectiveness and length of time that control will last depend on type of soil, amount of rain and other conditions.

**CAUTION: Keep Out Of Reach Of Children.**

Harmful if swallowed. Irritating to skin and eyes. Do not get on skin, in eyes or on clothing. In case of contact, immediately wash skin with plenty of water. For eyes, flush with water for at least 15 minutes and get medical attention.

Contains 1.03 pounds of active ingredient per gallon.  
Do not use or store near heat or open flame.

Manufactured by  
**WEST CHEMICAL PRODUCTS, INC.**  
42-16 WEST STREET, LONG ISLAND CITY, N.Y. 11101

**DIRECTIONS FOR USE:**

For treating one acre (43,560 square ft.), use 100 gallons of solution made by taking 20 gallons of ASSAULT and adding approximately 80 gallons of water. Apply uniformly throughout area. In case of exceptionally heavy vegetation, a second application may be required after 10 days. For small areas, dilute six (6) ounces of ASSAULT in one (1) quart of water to treat 100 square feet.

ASSAULT should be used only in equipment recommended by your West Representative. Use only a coarse wet spray to reduce drift. For best results, excess growth may be mowed and removed before applying ASSAULT.

**NOTE:** Do not apply, allow to drift or drain or flush onto or near croplands, lawns, trees, or other desirable plants, or to areas where their roots may extend. Do not contaminate domestic water supplies or irrigation ditches. Do not allow contact with fertilizers, insecticides, fungicides or seeds. Application equipment should be thoroughly cleaned after use with a detergent and water to prevent corrosion. Equipment which has been used to apply this product should not be used for applying insecticides, fungicides, fertilizers or other agricultural chemicals, as plant injury may result.

# Atra-bor

## Granular Herbicide

For nonselective or industrial weed control on noncrop land such as: industrial plant sites, rights-of-way, lumber yards, petroleum tank farms, and similar areas.

**Active Ingredients:**  
Atrazine (2-chloro-4-ethylamino-6-isopropylamino-s-triazine)  
Related Compounds:  
Disodium tetraborate decahydrate  
( $\text{Na}_2\text{B}_4\text{O}_7 \cdot 10\text{H}_2\text{O}$ )

**Inert Ingredients:**

**Total:**

Atra-bor 8P is an herbicide.
