**RODENT-ICIDES**

effective pest control products since 1932

J. T. EATON & COMPANY, INC. • 3110 WEST 65th STREET • CLEVELAND, OHIO 44102  
 Revised copy for Eaton's Sewer-Rat BAIT BLOCKS® Rodenticide USDA Reg. No. 56-20

**EATON'S SEWER-RAT  
 BAIT BLOCKS® Rodenticide**

**SPECIAL FORMULA:** EATON'S SEWER-RAT BAIT BLOCKS® contain a select choice combination of taste-tempting (to rat) ingredients blended with high potency anti-coagulant chemicals into a uniform standard, ready-to-use bait. The Paraffin used not only protects the bait in high-moisture areas but is also attractive to rodents.

There is no bait shyness - no prebaiting required - no tolerance build-up...just use as suggested.

**SUGGESTED USE:** For control in Sanitary and combination Sanitary and Storm Sewers, secure a BAIT BLOCK to one end of wire and attach other end of wire to bottom step of manhole ladder allowing just enough wire for BAIT BLOCK to rest on manhole benching.

In sewers with no benching at manhole, secure BAIT BLOCK to one end of wire and attach other end of wire to manhole ladder keeping BAIT BLOCK above water level. A board may be placed across sewer resting on opposite steps and BAIT BLOCK (secured to manhole ladder by wire) can be placed on board for the rodents to eat.

For control in Storm Sewers: BAIT BLOCKS can be suspended from sewer grates, with wire attached to grate so that the BAIT BLOCKS remain a few inches above normal water level.

In all installations, BAIT BLOCKS should be secured with wire so that they are not carried or floated away. Where rat infestations appear extremely heavy, use 2 or more BAIT BLOCKS in each manhole.

**KEEP BAITED AREAS WELL SUPPLIED:** Continuous feeding from 5 to 14 days should bring control. Bait should be available to rodents until complete lack of feeding is noticed. Never allow the baited sewers to remain empty for over 48 hours.

**CAUTION:** Protect bait from children, pets and domestic animals. If accidentally swallowed call a physician immediately. Treat as for overdose of DICUMAROL anti-coagulant.

**ACTIVE INGREDIENTS:**

{	Diphacinone-2-diphenylacetyl-1, 3-indandione	0.0025%
*	Sodium Salt of diphacinone-2-diphenylacetyl-1, 3-indandione	0.0027%
		99.9948%
		100.0000%

**INERT INGREDIENTS:**

\*Equal in killing power to other anti-coagulants at .025%

**CAUTION: KEEP OUT OF REACH OF CHILDREN** USDA Reg. No. 56-20  
**THIS PACKAGE FOR PROFESSIONAL & PUBLIC HEALTH OFFICIALS USE ONLY**

Manufactured & Guaranteed by
