Notice of Reregistration (continued) EPA Reg. No. 56-57

With this accepted labeling, the product meets the risk management goals of the Reregistration Eligibility Decision (RED) for the 1998 Rodenticide Cluster and the Risk Mitigation Decision for Ten Rodenticides (RMD). Therefore, EPA reregisters the product listed above. This action is taken under the authority of section 4(g)(2)(c) of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended. Reregistration under this section does not eliminate the need for continual reassessment of pesticides.

Confidential Statement of Formula

The acceptable Confidential Statement of Formula (CSF) for this product is dated June 23, 2003 (Basic Formulation). All other versions are obsolete.

Existing Stocks Provisions

- The registrant may not distribute or sell existing stocks of this product after June 4, 2011 unless they conform to the terms and conditions of registration as amended today.
- Any person other than the registrant may sell and distribute existing stocks of this product with the previously approved label until such stocks are exhausted.
- Any person may use existing stocks of this product with the previously approved label until such stocks are exhausted.

Submit one (1) copy of final printed labeling before you release the product for shipment. Amended labeling will supersede all previously accepted labels. A copy of your label stamped "Accepted" is enclosed for your records.

Follow the enclosed "Minimum Type Size Requirements for Final Printed Label".

If you have any questions or comments regarding this letter, please contact Mr. Dan Peacock by phone (703- 305-5407) or e-mail (peacock.dan@epa.gov).

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals

CAUTION: Harmful if swallowed or absorbed through the skin. Causes moderate eye irritation. Avoid contact with eyes, skin or clothing. Keep away from children, domestic animals and pets. Wear long-sleeved shirt, long pants, shoes, socks and waterproof gloves. Any person who retrieves carcasses or unused bait following application of this product must wear waterproof gloves.

User Safety Requirements:

- Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.
- Remove PPE immediately after handling this product. Wash the outside of gloves before removing.
- As soon as possible, wash hands thoroughly after applying bait and before eating, drinking, chewing gum, using tobacco or using the toilet and change into clean clothing.

	FIRST AID
	Have the label with you when obtaining treatment advice.
If Swallowed	Call a poison control center, doctor or 1-800-222-1222 immediately for treatment advice.
	Have person sip a glass of water if able to swallow.
	Do not induce vomiting unless told to by a poison control center or doctor.
If on Skin	Take off contaminated clothing.
or Clothing	Immediately rinse skin with plenty of water for 15-20 minutes.
	Call a poison control center, doctor or 1-800-222-1222 immediately for treatment advice.
If in Eyes	Hold eye open and rinse slowly and gently with water for 15-20 minutes.
	Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
	• Call a poison control center, doctor or 1-800-222-1222 immediately for treatment advice.

TREATMENT FOR PET POISONING

If animal eats bait, call a veterinarian at once.

NOTE TO PHYSICIAN OR VETERINARIAN

Anticoagulant Diphacinone: If swallowed, this material may reduce the clotting ability of the blood and cause bleeding. For humans or dogs that have ingested this product and/or have obvious poisoning symptoms (bleeding or prolonged prothrombin times), give Vitamin K_1 intramuscularly or orally.

Environmental Hazards

This pesticide is extremely toxic to mammals and birds. Dogs and other predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten this bait. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Runoff also may be hazardous to aquatic organisms in water adjacent to treated areas. Do not contaminate water when disposing of equipment wash water or rinsate.

ENDANGERED SPECIES CONSIDERATIONS

NOTICE: It is a Federal offense to use any pesticide in a manner that results in the death of a member of an endangered species. The use of this product may pose a hazard to Federally designated endangered/threatened species.

56-57: Page 3 of 6 02/28/11

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

NOTE: This label must be in the possession of the user at the time of pesticide application.

USE RESTRICTIONS

This product may only be used in manual, subterranean applications to control valley pocket gophers (Thornomys bottae), northern pocket gopers (T. talpoides, Mazama pocket gophers (T. mazama), Townsend's pocket gophers (T. townsend), giant pocket gophers (T. bulbivorus), Sierra pocket gophers (T. monticola) and plains pocket gophers (Geomys bursarius) in RANGELAND, CROPLAND (grain fields, forage corps, hay and alfalfa crops and vegetable crops), FOREST AND NONCROP AREAS including parks, nurseries and around homes. This product may only be applied at the use sites and by the application methods indicated on this label. Bait must be applied directly into pocket gopher burrow systems. Do not apply this product above the ground surface. Do not apply this product by use of a mechanical burrow builder machine or any other type of mechanical application equipment, including mechanized probes. Do not broadcast bait.

BAITING:

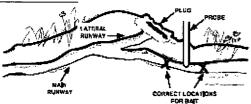

Place baits in main runways. To locate main runways, probe 12 to 18 inches from the surface mound on the side which is flattened or depressed using a burrow probe or a smooth metal rod. When resistance on probe suddenly decreases, probe is in the main runway. Open the runway with the probe, a spade or shovel. Place one BAIT BLOCK into each opening of the runway and cover the opening securely to exclude light. Do not permit the loose soil to cover bait.

Place baits at two or three locations in each main burrow (runway) system. A pocket gopher will normally travel to all portions of its burrow system within a few days. As some gophers may die above ground, check the area periodically for 10 to 15 days after treatment. Bury or incinerate (if permitted locally) any dead animals found. If pocket gopher activity persists 2 weeks after treatment, bait the active burrow a second time.

FOLLOW-UP:

Wearing waterproof gloves, collect and dispose of dead, exposed animals. Dispose of leftover bait in accordance with disposal instructions. If reinfestation does occur, repeat treatment.

GOPHER MOUND

Storage and Disposal

Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage: Store only in original container in a cool, dry place inaccessible to children and pets. Keep containers closed and away from other chemicals.

Pesticide Disposal: Wastes resulting from the use of this product may be placed in trash or delivered to an approved waste disposal facility.

Container Handling: Non-refillable container. Do not reuse or refill this container.

[Plastic] Triple rinse (or equivalent). Then offer for recycling or reconditioning or puncture and dispose of in a sanitary landfill, or by incineration.

[Paper] Dispose of empty container by placing in trash, at an approved waste disposal facility or by incineration.

NOTICE: To the extent consistent with applicable law, buyer assumes all risks of use, storage or handling of this material not in strict accordance with directions given herewith. The efficacy of the product may be reduced under high moisture conditions.

Product Batch Code No.
