OFFICE OF
PREVENTION, PESTICIDES AND
TOXIC SUBSTANCES

JUL 7 2008

H.R. McLane
Agent for J. T. Eaton & Co., Inc.
7210 Red Road, suite 206A
Miami, Florida 33143-5321

Subject: Label Notification(s) for Pesticide Registration Notices 2007-4

Dear Mr. McLane:

The Agency is in receipt of your Application(s) for Pesticide Notification under Pesticide Registration Notices (PRN) 2007-4 dated May 23, 2008 for:

EPA Registration 56-70

**JTeaton AC Formula 90 Ready-to-Use
Rodenticide**

The Registration Division (RD) has conducted a review of this request for applicability under PR Notices 2007-4 and finds that the label changes requested falls within the scope of PR Notices 2007-4. The label has been date-stamped "Notification" and will be placed in our records.

Please be reminded that 40 CFR Part 156.140(a)(4) requires that a batch code, lot number, or other code identifying the batch of the pesticide distributed and sold be placed on nonrefillable containers. The code may appear either on the label (and can be added by non-notification/PR Notice 98-10) or durably marked on the container itself.

If you have any questions, please contact me directly at 703-305-6249 or Nicole Williams of my staff at 703-308-8893.

Sincerely,

A handwritten signature in black ink, appearing to read "Linda Arrington".

PRECAUTIONARY STATEMENTS

HAZARD TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Keep away from humans, domestic animals and pets. Keep away from feed or foodstuffs. May be harmful if swallowed or absorbed through the skin. Wear gloves when handling this product. Avoid contact with skin, eyes or clothing. Wash thoroughly with soap and water after handling bait.

FIRST AID

Have this label with you when obtaining treatment advise.

If swallowed	<ul style="list-style-type: none"> • Call a Poison Control Center, doctor or 1-800-858-7378 immediately for treatment advice. • Have person sip a glass of water if able to swallow. • Do not induce vomiting unless told to by a poison control center or doctor.
If on skin or clothing	<ul style="list-style-type: none"> • Take off contaminated clothing. • Rinse skin immediately with plenty of water for 15 to 20 minutes. • Call a poison control center, doctor or 1-800-858-7378 immediately for treatment advice.

NOTE TO PHYSICIAN: If swallowed or absorbed through the skin this material may reduce the clotting ability of the blood and cause bleeding. If ingested administer Vitamin K₁ intramuscularly, or orally, as indicated in bishydroxycoumarin overdoses. Repeat as necessary based on monitoring of prothrombin times.

ENVIRONMENTAL HAZARD: This product is toxic to fish and wildlife. Dogs and other predatory and scavenging animals and birds might be poisoned if they feed upon animals that have eaten the bait. Do not apply this product directly to water. Do not contaminate water by cleaning of equipment or disposal of wastes.

STORAGE AND DISPOSAL

HOMEOWNER STORAGE AND DISPOSAL: **STORAGE:** Store only in original container in a dry place inaccessible to children and pets. **DISPOSAL:** If empty: Nonrefillable Container. Do not reuse or refill this container. Place in trash or offer for recycling if available. **If partly filled:** Call your local solid waste agency or 1-800' CLEANUP for disposal instructions. Never place unused product down any indoor or outdoor drain.

NON-HOMEOWNER STORAGE AND DISPOSAL: Do not contaminate water, food or feed by storage or disposal. **STORAGE:** Store only in original container in a cool, dry place inaccessible to children and pets. Keep containers closed and away from other chemicals. **PESTICIDE DISPOSAL:** Wastes resulting from the use of this product may be placed in trash or delivered to an approved waste disposal facility. **PESTICIDE CONTAINER:** Non-Refillable Container. Do not reuse or refill this container. Offer for recycling if available. Dispose of empty container 'by' placing in trash, at an approved waste disposal facility or by incineration or, if allowed by state and local authorities, by burning. If burned stay out of smoke. Call your Local Waste Agency for any questions on proper disposal.

NOTICE: Buyer and user assume all risk and liability of use, storage and/or handling of this product not in accordance with the terms of this label. 05-08-08.

 JTEATON® is a Registered Trademark and "AC FORMULA 90" is a Trademark of J.T. EATON & CO., INC.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ THIS LABEL. Read this entire label and follow all use directions and use precautions. Use only for the sites, pests and application methods described on this label. **IMPORTANT:** Do not expose children, pets, or other nontarget animals to rodenticides. To help prevent accidents: 1. Store product not in use, in a location out of reach of children and pets.

2. Apply bait in locations out of reach of children, pets, domestic animals, and nontarget wildlife, or in "tamper-resistant" bait stations. These stations must be resistant to destruction by dogs and by children under six years of age and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from stations when they are lifted, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hooved livestock raccoons, bears, other potentially destructive animals, or in areas prone to vandalism.

3. Dispose of product container, and unused, spoiled, and unconsumed bait as specified on this label.

Norway Rats Roof Rats and House Mice

USE RESTRICTIONS

For control of Norway Rats, Roof Rats, and House Mice in and around homes, industrial, and agricultural buildings and similar man made structures. Do not place bait in areas where there is a possibility of contaminating food, water, or surfaces that come in direct contact with food. Do not broadcast bait.

SELECTION OF TREATMENT AREAS

Determine areas where rats and mice will most likely find and consume the bait. Generally, these are along walls, by gnawed openings, in or beside burrows, in corners and concealed places, between floors and walls, or in locations where rodents or their signs have been seen. Protect bait from rain or snow. Remove as much food as possible.

APPLICATION DIRECTIONS:

The amount of bait in 3 x 1.5 ounce place pack of this product is unlikely to be sufficient to kill more than 1 or 2 rats.

- **For Rats:** Apply 3 to 10 place packs, (4.5 to 15 oz. of bait), per placement. Maintain an uninterrupted supply of fresh bait for at least 10 days.
- **For Mice:** Apply one place pack per bait placement. Space place packs at intervals of 8 to 12 feet. Maintain an uninterrupted supply of fresh bait for at least 15 days.
- **For Rats and Mice:** Replace contaminated or spoiled bait immediately. Using water-proof gloves collect and dispose of all dead animals and any leftover bait properly. To prevent reinfestation, limit as many sources of food, water, and harborages as much as possible. If reinfestation does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish with fresh bait as often as needed.

Chipmunks

USE RESTRICTIONS

For control of Chipmunks around the foundations of homes and other buildings, and adjacent patios, walls, and walkways where burrowing activity of these animals are compromising these structures by removal of soil and exposure to precipitation and weather. Use only in Tamper-Resistant Bait Stations. See description above. Available from J.T. Eaton & Co. (Telephone 1-800-321-3421.)

SELECTION OF TREATMENT AREAS: Determine areas where Chipmunks will most likely find and consume the bait. Generally, these are adjacent to burrow entrances and along burrow runways.

APPLICATION DIRECTIONS: For a minor infestation (1 to 3 animals) in one area, use a single tamper-resistant bait station. Place 1 to 3 place packs of this product on a Securing Rod (available from Eaton) inside of the bait station. Place bait station beside burrow or on runway and secure bait station to the ground with Eaton's "Securing Stake", or other means, to insure that bait station will not be moved or picked up; For more extensive infestations, use additional tamper-resistant bait stations~ no closer than 20 feet.

Check stations (daily, if possible) and maintain bait for a minimum of 10 days or until activity stops, determined by absence of plugged burrows, and absence of fresh signs of animals. Using waterproof gloves, collect and properly dispose of spilled bait and dead animals, whenever found. Remove bait stations at end of control program. 05-12-08.
