

Fenothox

INSTRUCTIONS FOR USE

For control of lice, apply Fenothox at the rate of 1 gallon to 150 gallons of water for dipping. For control of ticks, apply Fenothox at the rate of 1 gallon to 150 gallons of water for dipping. For control of mites, apply Fenothox at the rate of 1 gallon to 150 gallons of water for dipping. For control of flies, apply Fenothox at the rate of 1 gallon to 150 gallons of water for dipping. For control of mosquitoes, apply Fenothox at the rate of 1 gallon to 150 gallons of water for dipping. For control of beetles, apply Fenothox at the rate of 1 gallon to 150 gallons of water for dipping. For control of ants, apply Fenothox at the rate of 1 gallon to 150 gallons of water for dipping. For control of termites, apply Fenothox at the rate of 1 gallon to 150 gallons of water for dipping. For control of cockroaches, apply Fenothox at the rate of 1 gallon to 150 gallons of water for dipping. For control of fleas, apply Fenothox at the rate of 1 gallon to 150 gallons of water for dipping. For control of bed bugs, apply Fenothox at the rate of 1 gallon to 150 gallons of water for dipping. For control of wasps, apply Fenothox at the rate of 1 gallon to 150 gallons of water for dipping. For control of bees, apply Fenothox at the rate of 1 gallon to 150 gallons of water for dipping. For control of spiders, apply Fenothox at the rate of 1 gallon to 150 gallons of water for dipping. For control of scorpions, apply Fenothox at the rate of 1 gallon to 150 gallons of water for dipping. For control of crickets, apply Fenothox at the rate of 1 gallon to 150 gallons of water for dipping. For control of grasshoppers, apply Fenothox at the rate of 1 gallon to 150 gallons of water for dipping. For control of locusts, apply Fenothox at the rate of 1 gallon to 150 gallons of water for dipping. For control of beet beetles, apply Fenothox at the rate of 1 gallon to 150 gallons of water for dipping. For control of weevils, apply Fenothox at the rate of 1 gallon to 150 gallons of water for dipping. For control of earwigs, apply Fenothox at the rate of 1 gallon to 150 gallons of water for dipping. For control of sawflies, apply Fenothox at the rate of 1 gallon to 150 gallons of water for dipping. For control of caterpillars, apply Fenothox at the rate of 1 gallon to 150 gallons of water for dipping. For control of moths, apply Fenothox at the rate of 1 gallon to 150 gallons of water for dipping. For control of butterflies, apply Fenothox at the rate of 1 gallon to 150 gallons of water for dipping. For control of bees, apply Fenothox at the rate of 1 gallon to 150 gallons of water for dipping. For control of wasps, apply Fenothox at the rate of 1 gallon to 150 gallons of water for dipping. For control of ants, apply Fenothox at the rate of 1 gallon to 150 gallons of water for dipping. For control of termites, apply Fenothox at the rate of 1 gallon to 150 gallons of water for dipping. For control of cockroaches, apply Fenothox at the rate of 1 gallon to 150 gallons of water for dipping. For control of fleas, apply Fenothox at the rate of 1 gallon to 150 gallons of water for dipping. For control of bed bugs, apply Fenothox at the rate of 1 gallon to 150 gallons of water for dipping. For control of spiders, apply Fenothox at the rate of 1 gallon to 150 gallons of water for dipping. For control of scorpions, apply Fenothox at the rate of 1 gallon to 150 gallons of water for dipping. For control of crickets, apply Fenothox at the rate of 1 gallon to 150 gallons of water for dipping. For control of grasshoppers, apply Fenothox at the rate of 1 gallon to 150 gallons of water for dipping. For control of locusts, apply Fenothox at the rate of 1 gallon to 150 gallons of water for dipping. For control of beet beetles, apply Fenothox at the rate of 1 gallon to 150 gallons of water for dipping. For control of weevils, apply Fenothox at the rate of 1 gallon to 150 gallons of water for dipping. For control of earwigs, apply Fenothox at the rate of 1 gallon to 150 gallons of water for dipping. For control of sawflies, apply Fenothox at the rate of 1 gallon to 150 gallons of water for dipping. For control of caterpillars, apply Fenothox at the rate of 1 gallon to 150 gallons of water for dipping. For control of moths, apply Fenothox at the rate of 1 gallon to 150 gallons of water for dipping. For control of butterflies, apply Fenothox at the rate of 1 gallon to 150 gallons of water for dipping.

Mixing with Water

- Mix Fenothox with the proper amount of water in accordance with dilutions recommended on label.
- Do not mix Fenothox with other chemicals before use.
- For smaller quantities, mix Fenothox with water at the rate of 1 gallon of water to 150 lbs. of water.
- For disinfectant (Dipping Vats) Apply Fenothox with recommended dilution for all fresh water dipping vats.

WARNING

May be fatal if swallowed. Fenothox is toxic and is absorbed through the skin in dry form. Do not get on face, neck, or in eyes, nose, or breathing apparatus. Use respirator or goggles if necessary. Keep clothing free from residue. Do not use on food, feed, or dry animal household rats. Do not use on young animals. If treatment of young animals is necessary, spraying is recommended. Do not use on dairy animals in dairy barns, milk rooms, in milking parlors or on feed troughs to be fed to dairy animals or other animals to be finished for slaughter. Do not spray within 30 or 60 days of slaughter. This product is toxic to fish, birds, and wild birds. Keep out of lakes, streams or ponds. Do not contaminate water or air during the application or disposal of waste. Apply this product only as specified on the label.

Do not use on open flames. Do not use on heat or open flame.

Antidote

For treatment of acute poisoning, give 15 grams (one-half ounce) of sodium bicarbonate in water. For treatment of chronic poisoning, wash with plenty of water.
