

[59-111]

**DIRECTIONS**

Pulvex Kitty and Cat Flea Spray makes a slight hissing sound and causes a cool sensation. Cats are very sensitive to noises so it is recommended that the pet be held similarly to the method a mother cat carries her kittens. Grasp the loose skin by the neck, gently but firmly, and hold the pet aloft. This method will not harm the pet in any way and the pet becomes quite docile and remains quiet during the application of the spray.

Hold Pulvex Kitty and Cat Spray in upright position 5-6 inches from the pet. Point nozzle in directions spray is desired. Release spray by placing tip of index finger on nozzle and gently push forward. Do not hold tips of fingers in front of nozzle. Move can rapidly in zigzag motion over entire pet until hair is slightly damp. Do not spray directly into face.

**WARNING:** Contents under pressure. Do not puncture. Do not use or store near heat or open flame. Exposure to temperatures above 130 F may cause bursting. Never throw container into fire or incinerator.
