

Smear-K

DIRECTIONS FOR USE

Screw Worm and Blowfly Infestations

Apply with swab or brush, working into deep pockets. Also spread smear around and over drainage area below wound. Re-treat if necessary. Freely bleeding wounds may require several applications.

To Prevent Screw Worm and Blowfly Infestations

Treat fresh wounds resulting from dehorning, castrations, shear cuts, etc. Also treat navels of newborn animals. Re-treat as needed.

Fleece Worm and Other Blowfly Infestations

Mix one part Smear-K with nine parts water. Apply as a wash on and around infested areas.

Ear Tick and Ear Mite Control

Pour undiluted smear in ears or apply with a brush or swab.

CAUTION

Harmful if swallowed. Injurious to eyes; do not get in eyes. Avoid contact with skin or clothing. Wash from hands and skin after handling. Avoid contamination of feed and foodstuffs.

Do not reuse container. Destroy when empty.

First Aid Treatment: In case of contact with human eyes, flush eyes immediately with plenty of water and get prompt medical attention. Note to physician: Ronnel is a cholinesterase inhibitor. Atropine is antidotal. 2-PAM is also antidotal and may be administered in conjunction with atropine.

WARNING: Ronnel is a cholinesterase inhibitor.

Do not use this product on animals simultaneously or within a few days before or after treatment with or exposure to cholinesterase inhibiting drugs, pesticides or chemicals. Consult a veterinarian at first sign of adverse reaction. Atropine is antidotal.

For external use only. Livestock Remedy—Not for human use.
