JUN 26 1984
Under the Federal Insecticide,
Fungicide and Rodenticide Act,
as amended for the pesticide
registered under
EPA Reg. No. 603

ACTIVE INGREDIENT:
Ortho-chloro Phthalic Acid 4.50%
INERT INGREDIENTS: 95.50%
Total 100.00%

EPA Reg. No. 60- EPA Act. No. 60-11-1

KEEP OUT OF REACH OF CHILDREN

CAUTION

See Side Panel For Additional Precautionary Statements

STATEMENT OF PRACTICAL TREATMENT:

If Swallowed - Immediately call your local Poison Control Center. If eye contact, flush with plenty of water. Get medical attention if irritation persists.

Net Content: 1.00 L (3.38 FL OZ)

Manufactured by: **ADIA, INC.**

DEPT. OF AGRICULTURE, 1501
ARADIA, ILL. 62411

HOW IT WORKS

Ant colonies send out scout worker ants to explore for other food sources and direct worker ants. The low toxicity of GATOR ANT BAIT will enable the scout worker to accept and direct worker ants to eat the bait. The worker ants will return to the colony to feed other ants and the queen. The continuous feeding on GATOR ANT BAIT will increase the toxicity buildup causing the colonies to die out over a period of time.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

HOW & WHERE TO USE - This product is Ready To Use and is easily squeezed thru the handy "Dispenser Tip". Use directly on the surface where ants are seen or with the small square "Bait Stations" in this container. Apply a small circle of bait where ants are found, such as near ant trails, under and behind stoves, refrigerators, food storage bins, or trash and garbage disposal areas, along baseboards in the kitchen, and areas where they enter the indoors through doorways, windows, screens and through electrical or plumbing lets. It may be used in Food Storage Areas, Processing & Serving Areas, in the Bathroom, Sleeping Rooms, Closets, and Food Disposal Areas in homes, apartments, condominiums and other location as listed.

For best control dispense in many unseen locations or use several "Bait Stations" in each room. Discard or replenish bait as it may become dirty, over-run by dead ants, or control has been achieved. Inspect them weekly to make sure of effectiveness. Keep bait in use for at least 3 to 4 weeks and repeat as needed for control. A highly significant reduction of ant populations can be expected within the first 30 days of bait and if baiting is maintained for up to 3 months, the treatment is capable of destroying entire ant colonies which are entering or living inside the premises. **DO NOT PLACE THE BAIT IN AREAS OR LOCATIONS ACCESSIBLE TO CHILDREN OR PETS. DO NOT** apply directly on any surface that may be stainable, such as Limestone or Marble surfaces. Use "Bait Stations" or other materials to protect porous surfaces.

OTHER INSECTS CONTROLLED - Roaches, Silverfish, Waterbugs and Crickets that may feed on this bait will also be killed. For control, bait the areas where they have been seen, marking several bait locations. Keep bait out for 3 to 4 weeks. Replace bait as needed.

FOOD HANDLING AREAS - This product is safe for use in food handling areas where ants are a problem. It is safe for use in food storage areas, processing and serving areas, in the kitchen, and areas where they enter the indoors through doorways, windows, screens and through electrical or plumbing lets. It may be used in Food Storage Areas, Processing & Serving Areas, in the Bathroom, Sleeping Rooms, Closets, and Food Disposal Areas in homes, apartments, condominiums and other location as listed.

PRECAUTIONARY STATEMENTS
Hazards To Humans and Domestic Animals

CAUTION: Harmful if swallowed. May cause eye irritation. Avoid contact with eye. Wash thoroughly after handling and before eating or smoking. Place Bait in areas inaccessible to children and pets. Do not contaminate feed or foodstuffs with this product. Keep out of reach of children.

STORAGE & DISPOSAL

Do not contaminate water, food, or feed by storage or disposal. Do not reuse this container. Securely wrap original container in several layers of newspaper and discard in trash.

5' 'SFACTION GUARANTEED - If not satisfied, when used properly, return to manufacturer for prompt refund.
