

CONTENTS OF THIS BOTTLE WILL MAKE  
80 GALLONS OF FINISHED SPRAY.

READ CAUTIONS AND DIRECTIONS BEFORE BEGINNING APPLICATION.

**SLAB-TYPE CONSTRUCTION**

(a) Apply 1 gallon per 10 sq. ft. as an overall pre-construction treatment under the slab and under attached porches. (b) Apply 2 gallons per 5 lineal feet to crucial areas under the slab as pre-construction treatment such as along the inside of foundation walls and around utility entrances and interior partition foundation walls. (c) Apply along the outside of the foundation as indicated below.

**BUILDINGS HAVING BASEMENTS OR CRAWL SPACES**

Drill a trench from the inside of the foundation wall to back yard or to a block or light pole four feet wide, four feet deep, but not below four feet. Fill the trench with the product at the rate of 1 gallon per 10 lineal feet for each foot of depth. A trench 3 feet deep would require 12 gallons per 10 lineal feet.

For buildings with basements, construct a barrier of the product around the perimeter of the basement floor and walls. The product should be applied at the rate of 1 gallon per 10 sq. ft. of area.

**WOOD TREATMENT**

For wood treatment, use the product to penetrate wood surfaces. The product should be applied at the rate of 1 gallon per 10 sq. ft. of area. The product should be applied to all wood surfaces that will be in contact with the ground.

- Do it yourself Termite Control.
- Easy to apply, No Special Skill Required.
- Simply Follow Directions For Control of Termites Around Homes.

# Termi-Ded

EPA REG. NO. 70-119

<b>ACTIVE INGREDIENTS</b>

Apply To Make 80 Gallons of Finished Spray

1 Gallon of Termi-Ded + 79 Gallons of Water

2 Gallons of Termi-Ded + 76 Gallons of Water

3 Gallons of Termi-Ded + 73 Gallons of Water

**WARNING:** Harmful if swallowed. Contact with skin can cause liver symptoms. Avoid breathing Spray Mist. Keep out of reach of children. Read directions carefully, and note cautions before using. In case of emergency, wash with soap and water. Do not eat, drink, or use tobacco products.

**These are the signs of Subterranean Termite Infestation—**

- Mud shelter tubes over foundation walls.
- Wood that is tunneled or hollowed out beneath the surface.
- Swarms of winged adults in spring or fall. (Do not confuse with winged ants. Ants have a narrow waist.)

**WARNING**
