

HOW TO MIX AND APPLY:

For lawns measure the area to be sprayed. For all other applications, apply as a thorough cover spray. Make applications when insects first appear or in advance of an expected infestation. Repeat applications as needed or as noted in Rate Chart. Use coarse drenching spray for lawns, soil and surface applications. Thorough coverage is important. Keep tightly capped. Use clean sprayer. Flush sprayer after each use.

See Rate Chart below for Complete Insect List—Use dosages shown unless otherwise indicated.

(Note: Do not use on certain ferns, poinsettia, hibiscus, papaya, pinea, gardenia and orchids, since injury may occur.)

Preparation	Rate	Note & Area Covered	Notes
For lawns	1/2 oz. per 100 sq. ft.	Use coarse drenching spray	Apply when insects first appear or in advance of an expected infestation.
For soil and surface applications	1/2 oz. per 100 sq. ft.	Use coarse drenching spray	Apply when insects first appear or in advance of an expected infestation.
For other applications	1/2 oz. per 100 sq. ft.	Use thorough cover spray	Apply when insects first appear or in advance of an expected infestation.
