

DIRECTIONS FOR RATS

Place 4 oz. of Kill-Ko Rat
bait into a shallow con-
tainer and place next to
mouse hole or runways, or
near rat feed, water or
travel. It is desirable to
place bait where you can
observe and to provide
a place where the rat can
feed and rest.

Check bait stations daily to
assure an uninterrupted
supply of bait for at least
15 days. Continue baiting
until you are satisfied
there is no pest problem.

For more information on
pest control, contact your
local health department or
pest control agency.

**DIRECTIONS
FOR RATS**

Pour 4 oz. of Kill-Ko Rat Gard into a shallow container and place next to burrows, in runways or where rats feed, water or travel. It is desirable to place bait along walls, in corners, and in concealed locations where rats can feed un-observed.

Check bait stations daily to assure an uninterrupted supply of bait for at least 15 days. Continue baiting until all signs of feeding have stopped. Contaminated or spoiled bait should be replaced promptly. Four ounces of Kill-Ko Rat Gard is effective for 1 or 2 rats. Bait stations should be placed in areas not accessible to children, pets, wild life and domestic animals or in tamper-proof bait boxes. Set up permanent stations if you are near rat-infested fields or dumps. Protect from rain.
