

KILL-KO

RAT BLUES-D

This bait is colored blue-green as an added safety precaution when used in and around feed mills as well as food processing plants. When used in USDA inspected plants, use in accordance with Meat and Poultry Inspection Procedures.

CAUTION:
KEEP OUT OF REACH OF CHILDREN

In case bait is eaten by humans, call physician at once. Treat as for overdose of Dicoumarol. This product is toxic to wildlife. Do not contaminate water by disposal of unused bait.

Do not reuse empty containers (unless drum). Destroy it by burying with waste or burning. Stay away from smoke or fumes. Drums may be reused for non-food or feed purposes if thoroughly cleaned.

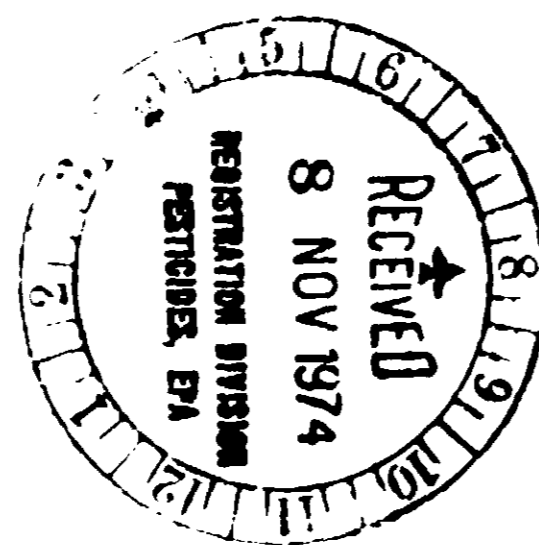

ACTIVE INGREDIENT: Diphacinone (2-diphenylacetyl-1,3-Indandione) .005%
INERT INGREDIENTS: 99.995%

EPA REG. NO. 70-198
EPA EST. NO. 70-KY-1

CAUTION:
KEEP OUT OF REACH OF CHILDREN
See side panel for additional cautions

RAT BLUES-D

DIRECTIONS

Pour 4-16 ozs. of Kill-Ko Rat Blues-D into a shallow container and place next to burrows, in runways or where rats feed, water or travel. It is desirable to place the bait along walls, in corners, and in concealed locations where rats can feed un-observed.

Check bait stations daily to assure an uninterrupted supply of bait for at least 15 days. Continue baiting until all signs of feeding have stopped. Contaminated or spoiled bait should be replaced promptly. Four ounces of Kill-Ko Rat Blues-D is effective for 1 or 2 Norway or roof rats. Bait stations should be placed in areas not accessible to children, pets, wildlife and domestic animals or in tamper-proof bait boxes. Set up permanent stations if you are near rat-infested fields or dumps. Protect from rain.
