

R I G O

INSECT KILLER
DUST

Kills Cockroaches, Ants, Fleas,
Brown Dog Ticks, Spiders, Wasps,
Crickets, Silverfish and More.

ACTIVE INGREDIENT:

Bendiocarb: (2,2-dimethyl-1,3-benzodioxol-4-ol
methylcarbamate[†])..... 1%

INERT INGREDIENTS:..... 99%
TOTAL 100%

[†]Protected by U.S. Patent No. 3,736,338

CAUTION

KEEP OUT OF REACH OF CHILDREN

See side panel for additional precautionary information and first aid.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS
AND DOMESTIC ANIMALS

Harmful if swallowed, inhaled or absorbed through the skin. Do not breathe dust. Do not allow to contact skin, eyes or clothing.

Wash hands and exposed skin before eating, drinking or smoking and after handling. Wash all contaminated clothing thoroughly before reuse.

STATEMENT OF PRACTICAL TREATMENT

IF SWALLOWED - Drink 1 or 2 glasses of water and induce vomiting by touching back of throat with finger. Do not induce vomiting or give anything by mouth to an unconscious person. Get medical attention.

IF INHALED - Keep patient strictly at rest and transfer to hospital immediately to get medical attention.

IF ON SKIN - Wash with soap and warm water.

IF IN EYES - Rinse thoroughly with clean water.

NOTE TO PHYSICIAN: Contains anticholinesterase carbamate insecticide. In cases of overexposure, atropine sulfate - 2 mg. (equivalent to 1/30 grain adult dose) should be given and repeated as necessary until fully atropinized.

ENVIRONMENTAL HAZARDS

This product is highly toxic to bees exposed to direct treatment or to residues on plants.

Do not apply directly to water. Do not contaminate water by cleaning of equipment or disposal of wastes.

PRECAUTIONS

Do not use on or contaminate fruit, vegetables or other food or feed crops.

Do not apply to humans, animals, clothing or bedding.

Do not contaminate feed or food products or food preparation surfaces, dishes, kitchen utensils and food containers.

IMPORTANT: Read the entire Directions for Use and Notice before using this product.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Insect Killer Dust is for residual pest control in and on buildings and structures and their immediate surroundings. Permitted areas of use include, but are not limited to: houses, garages, trailers, campers, storage sheds, apartment buildings, stores, warehouses, industrial buildings, schools, nursing homes, hospitals, restaurants and hotels.

INDOOR USE

Insect Killer Dust is intended for application with a shaker or puffer container to hiding and runway areas and those places where pests are found. The amount to be applied will vary with the site, but should usually be in the range of 1/3 to 2/3 ounces of dust per square yard.

Cockroaches, Ants, Crickets, Silverfish and Firebrats: Thoroughly dust all areas where these pests crawl and hide, especially cracks and crevices around sinks, stoves, refrigerators and cabinets; behind baseboards; around doors and windows and in attics, basements and crawl spaces. For ants, apply to ant trails and around doors and windows where they may enter premises.

Carpenter Ants: Dust around doors and windows and other places where these pests enter premises. When possible, locate and dust nests and surrounding areas.

Brown Dog Ticks and Fleas in Buildings: Dust infested areas such as pet beds and resting quarters, nearby cracks and crevices, under the edges of rugs and floor coverings, between and under cushions of upholstered furniture and other places where these pests may hide. Old bedding of pets should be removed after treatment of pet areas and replaced with clean fresh bedding. Additionally, ensure that pets are treated with an EPA approved product registered for pet use. **DO NOT TREAT ANIMALS OR THEIR BEDDING WITH THIS PRODUCT.**

Spiders: Dust along and behind baseboards, window and door frames, corners, pipes, storage localities, attics, basements, crawl spaces and other areas where spiders may hide.

Wasps: It is best to treat wasp nests at night when insects are less active and have returned to the nest. Do not wear loose fitting clothing - take necessary precautions to avoid stings. For best results, carefully dust near nest and check one or two days after treatment to ensure complete kill, and retreat if necessary. If possible, remove and destroy nest to prevent hatching of new insects. For ground nests, carefully dust entrance

Page 4

and surrounding areas. Retreat in one or two days if wasp activity is still present. Do not use this product to treat nests overhead.

Sowbugs, Pillbugs, Ground Beetles, Earwigs, Millipedes, Centipedes and Scorpions: Apply around doors, windows and other places where these pests may enter. Treat baseboards, storage areas, and cracks and crevices, especially in dark, musty areas where these pests may hide.

OUTDOOR USE

Perimeter Treatment: Use Insect Killer Dust as a residual treatment for control of ants, brown dog ticks, centipedes, cockroaches, crickets, earwigs, firebrats, fleas, ground beetles, millipedes, pillbugs, scorpions, silverfish, sowbugs, spiders and wasps. Make a residual treatment around windows and doors, porches, screens, eaves, patios, garages, under stairways and in crawl spaces and other areas where pests hide.

To help prevent invasion of buildings and structures by the above pests, treat a band of soil and vegetation 6 to 10 feet wide around and adjacent to the building or structure. Also treat the building foundation and crawl spaces where pests are active and may find entrance. Apply thoroughly and uniformly to the band area. Pay particular attention to ant hills and wasp nests in the band area. Wasp nests in trees and shrubs may be treated as noted above.

Fire Ants: Stir 7 oz. of Insect Killer Dust into 2 gallons of water. Pour a small amount of material around the perimeter of the mound. Apply the remaining volume directly on the mound so as to penetrate insect galleries, using 2 gallons of mixture on mounds 8 inches or larger in diameter. Less mixture can be used on smaller mounds; however, thorough penetration of the insect galleries must be achieved. A second treatment may be necessary if complete control is not obtained.

Do not disturb the mound prior to application. If possible, make application after a recent rainfall. Applications may not be as effective during hot, dry periods. If possible, treat all colonies in the vicinity. Also, treat colonies which have not yet constructed a mound.

STORAGE AND DISPOSAL

Keep pesticide in original container. Do not store near feed or food products. Do not reuse empty container. Wrap and dispose of empty container in trash collection.

NOTICE: Seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risks of use and/or handling of this material when such use and/or handling is contrary to label instructions.

SIGNATURE OF APPROVING OFFICIAL

DATE

- c. Your "Precautions" paragraph should be placed in your "Hazards to Humans and Domestic Animals" section.
- d. Revise your directions for control of carpenter ants to include the following:

Also force dust into infested wood through existing openings or newly drilled small holes.

- e. Add the following to your directions for control of fireants:

For best results apply in cool weather, 65-80°F, or in early morning or late evening hours. Pressurized sprays may disturb the ants and cause migration, reducing product effectiveness.

- f. Revise your Storage and Disposal directions to read as follows:

Storage: Do not contaminate water, food or feed by storage or disposal. Keep pesticide in original container. Store in a cool, dry place, preferably in a locked storage area.

Product Disposal: Partially filled bag may be disposed of by securely wrapping original container in several layers of newspaper and discarding in trash container disposal. Do not reuse bag. Discard bag in trash.

- 3. Submit five (5) copies of your final printed labeling before you release the product for shipment. Refer to the A-7¹ Enclosure for a further description of final printed labeling.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.
